From an insider's perspective, Juergen Dedring offers a systematic overview of the work of the United Nations Security Council following the end of the Cold War. He explores the nature of the Security

Council's decision-making process and its transformation as a result of the basic learning taking place among its fifteen members and other participants on the one hand, and the challenges presented by a constantly changing world on the other. He examines the increasing transparency of the Council's political process and the increased participation of nonmember states and organizations. Discussions of numerous agenda items and thematic issues not usually covered by the media are included, along with case studies of situations in the occupied Arab territories, Tajikistan, and Sierra Leone. Dedring argues that the Security Council, whose purpose is to maintain international peace and security, has not only continued to perform its charter-based function, but has also experienced a phase of resurgence and renewal that has been effective in changing the Council's

role in the center of the global system.

## Review

Uncovers the underlying structures of Martin Buber's thought across his diverse writings.

The Ohio Farmer Simon and Schuster

This issue of Finance & Development examines the good and bad sides of globalization. Sebastian Mallaby notes that after decades of increasing cross-border movements of capital, goods, and people, only migration continues apace. Capital flows have collapsed, and trade has stagnated. However, rather than a sign of retreat, trade and finance may be resetting to a more sustainable level consistent

with continued globalization.

IMF Chief Economist Maurice Obstfeld takes a closer look at trade. Ismaila Dieng profiles Leonard Wantchekon, a former activist who plans to train the next generation of African economists. Wantchekon, now a professor at Princeton University, is one of the few African economists teaching at a top US university. His research, which has received considerable attention from development economists, focuses on the political and historical roots of economic development in Africa.

A gripping tale of social inequality and political intrigue, *Sybil or the Two Nations* follows the fortunes of two young protagonists, Charles Egremont and Sybil Gerard, as they navigate the turbulent social currents of Victorian England. Along the way, Disraeli offers a scathing critique of the industrial revolution, the perils of unrestricted capitalism, and the need for political reform. With its vivid characters, stirring speeches, and memorable set

---

pieces--including the violent confrontation between mill workers and soldiers at the climax of the book--*Sybil* remains one of the most powerful and influential novels of the nineteenth century. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Country image and related constructs, such as country reputation, brand, and identity, have been subjects of debate in

fields such as marketing, psychology, sociology, communication, and political science. This volume provides an overview of current scholarship, places related research interests across disciplines in a common context, and illustrates connections among the constructs. Discussing how different scholarly perspectives can be applied to answer a broad range of related research questions, this volume aims to contribute to the emergence of a more theoretical, open, and interdisciplinary study of country image, reputation, brand, and identity.

### Communities in Action

Cambridge University Press  
Widely understood to be the

best tool of social change, education offers a space to interrogate persistent and damaging oppressions, calling into question the cultural and political antecedents, as well as the current politics and practices, that have facilitated inequity. Educational leaders themselves, however, have much to learn about dismantling systems that maintain these barriers. Diversity Leadership in Education offers a deep look into the complexities and opportunities afforded by new models of diversity leadership. Authors from across North America explore how diverse leaders are key to

improving the school experience for marginalized students. Indigenous, Black, racialized, and collaborative forms of leadership contribute to decolonizing educational settings by unsettling hegemonic ideas; these include the dominance of equity myths in educational administration and pedagogical whitewashing around issues germane to social justice. Unpacking privilege in education systems, the volume speaks to incorporating social justice in everyday leadership practices through advocacy, solidarity, spirituality, relationality, and reconciliation.

It profiles diversity leadership as a rudder, steering a more inclusive and equitable society.

In many societies, histories of exclusion, racism and nationalist violence often create divisions so deep that finding a way to deal with the atrocities of the past seems nearly impossible. These

---

societies face difficult practical questions about how to devise new state and civil society institutions that will respond to massive or systematic violations of human rights, recognize victims and prevent the recurrence of abuse.

**Identities in Transition:**

**Challenges for Transitional Justice in Divided Societies**

brings together a rich group of international researchers and practitioners who, for the first time, examine transitional justice through an 'identity' lens. They tackle ways that transitional justice can act as a

means of political learning across communities; foster citizenship, trust and recognition; and break down harmful myths and stereotypes, as steps toward meeting the difficult challenges for transitional justice in divided societies.

How game theory can offer insights into literary, historical, and philosophical texts ranging from

Macbeth to Supreme Court decisions. Game theory models are ubiquitous in economics, common in political science, and increasingly used in psychology and sociology; in evolutionary biology, they offer compelling explanations for competition in nature. But game theory has been only sporadically applied to the humanities; indeed, we almost never associate mathematical calculations of strategic choice with the worlds of literature, history, and philosophy. And yet, as Steven Brams shows, game theory can illuminate the rational choices made by characters in texts ranging from the Bible to Joseph Heller's *Catch-22* and can explicate strategic questions in law, history, and philosophy. Much of

---

Brams's analysis is based on the theory of moves (TOM), which is grounded in game theory, and which he develops gradually and applies systematically throughout. TOM illuminates the dynamics of player choices, including their misperceptions, deceptions, and uses of different kinds of power. Brams examines such topics as the outcome and payoff matrix of Pascal's wager on the existence of God; the strategic games played by presidents and Supreme Court justices; and how information was slowly uncovered in the game played by Hamlet and Claudius. The reader gains not just new insights into the actions of certain literary and historical characters but also a larger strategic perspective on

the choices that make us human. Stress-Free ACT Routledge

The United Nations World Water Development Report, published every three years, is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind, resulting from the collaboration and contributions of the 26 UN agencies, commissions, program, funds, secretariats and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises - in climate change,

energy and food and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet 's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development and technological change. Adding complexity and risk is climate change, with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows

---

how some countries have responded. Progress in providing drinking water is heartening, with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now!
