Teenagers Billy Mac, Emmett, Maddie and Joseph are back in this sequel to "The Mystery of the Tomahawk Pipe". It is 1925, a year after their adventure began. Warm weather and low water levels finally allow them to venture back into the flooded cave. They find Tecumseh's gold really was

hidden there at one time, but it has since been moved. Who moved it, why, and where is it now? The four friends must battle time and the treachery of an old adversary to find the treasure. But, danger, deceit - and even death - counter their search for answers. With the help of an unlikely band of ragamuffins and Billy Mac's newfound guardian spirit, they unravel a trail of clues that lead them to the truth, but the cost is high. In this adventure built around the real-life legend of Tecumseh's hidden gold, everyone from the original story is back. Together, they discover not only the secret of the gold, but truths about themselves, as well.

History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh\*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f\*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f\*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how. *GMAT Roadmap: Expert Advice Through Test Day* Wiley Global Education

This book is about advertising and culture. Advertising is a significant aspect of modern societies and plays an important part in economic activity. It is a highly visible component of everyday life and increasingly of contemporary culture. The book considers culture as a broad category of human endeavour and experience. It takes a multidisciplinary approach drawing on media and cultural studies and the study of history and of art history, sociology, politics and political economy for ideas and explanations that can be applied to advertising and culture. Indeed, the book's contributors are drawn from each of these areas of academic enquiry. Their contributions represent strands and tensions in the relationship between different aspects of culture, such as fashion, art, popular music, politics and media and the world of advertising. The book raises the question of how, to what effect and with what intensity, advertising features – as the Advertising Standards Authority, the UK's advertising regulator, recently put it – as a 'common subject' in our cultural lives. The book deals with advertising and culture primarily within a British context, but in an increasingly globalised world many of its themes and issues are relevant to societies where advertising is a growing presence. This book explores the relationship between advertising and culture and this introduction outlines the book's scope, content and themes.

In thousands of years of tilling the soil, we have created a great variety of garden tools to dig, cut scrub, harrow fields, and trim borders. What makes the tools unique, and collectible, is the way function has dictated form, resulting in not only ingenious shapes, but artistic ones. In the 19th and early 20th centuries garden tool catalogues listed hundreds of task-specific tools including dibbers, mattocks, potato hoes, onion hoes, daisy grubbers, claws, weeders, forcers, straighteners, garden row markers, garden reels, rakes, watering cans, water tanks, lawn mowers, lawn rollers, weed whackers, and many more. This book looks back at two hundred years of garden history, and attempts to identify the tools and accessories that gardeners used, and as much as possible identify their specific functions. With over 750 colour photographs, concise captions, and a guide to prices in today's antique marketplace, this is a useful as well as beautiful exploration of garden implements.

There's something in the earth deep below Elise Kavanagh's territory. A shadow is falling upon local demons to devour their flesh and harvest their souls. And it's coming for Elise next. The Union has an easy way out. They want to send Elise into hiding again with her former partner, James Faulkner. All she has to do is surrender the territory and trust that they can protect the ethereal ruins, the dark gate, and the city she's come to know as home. Greater powers have other plans for Elise and her fabled power as Godslayer—plans that mean surrendering her life and blood to the most powerful demon alive. But if she descends, there's no turning back. Once she gazes into the abyss, it will gaze back into her...and Elise will be damned forever.

Michelle Kennedy had a typical middle class American childhood in Vermont. She attended college, interned in the U.S. Senate, married her high school sweetheart and settled in the suburbs of D.C. But the comfortable life she was building quickly fell apart. At age twenty-four Michelle was suddenly single, homeless, and living out of a car with her three small children. She waitressed night shifts while her kids slept out in the diner's parking lot. She saved her tips in the glove

compartment, and set aside a few quarters every week for truck stop showers for her and the kids. With startling humor and honesty, Kennedy describes the frustration of never having enough money for a security deposit on an apartment—but having too much to qualify for public assistance. Without A Net is a story of hope. Michelle Kennedy survives on her wits, a little luck, and a lot of courage. And in the end, she triumphs.

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.
