If your hobby is amateur radio or  
electronics you will often need coils in a  
variety of size, type, specification, etc..  
Coils are no longer as easy to find as

they were 20 years ago so you will have  
to wind your own. With the help of this  
simple yet detailed manual you'll  
quickly build a machine that can wind  
universal and honey comb coils, single  
layer and multi layer solenoids, close  
wound and space-wound coils, and pi-  
spaced coils such as those used for r-f  
chokes and transformers. And the  
mechanical counter gives you total  
control of accuracy.
