Briggs and Stratton 4-Stroke Horizontal Crankshaft from 1950 Haynes Manuals N. America, Incorporated
As budgets tighten for school districts, a sound understanding of just how teaching and administration translate into student learning becomes increasingly important. Rebecca Barr, a researcher of classroom instruction and reading skill development, and Robert Dreeben, a sociologist of education who analyzes the structure of organizations, combine their expertise to explore the social organization of schools and classrooms, the division of labor, and the allocation of key resources. Viewing schools as part of a social organization with a hierarchy of levels—district, school, classroom, instructional group, and students—avoids the common pitfalls of lumping together any and all possible influences on student learning without regard to the actual processes of the classroom. Barr and Dreeben systematically explain how instructional groups originate, form, and change over time. Focusing on first grade reading instruction, their study shows that individual reading aptitude actually has little direct relation to group reading achievement and virtually none to the coverage of reading materials once the mean aptitude of groups is taken into consideration. Individual aptitude, they argue, is rather the basis on which teachers form reading groups that are given different instructional treatment. It is these differences in group treatment, they contend, that explain substantial differences in learning curricular material.

Fort Worth sits on a blend of timber and prairie land that is transected by the Trinity River and its tributaries. These physical attributes invited the creation of parks to preserve scenic landscapes and to provide Fort Worth residents with access to nature. Generous land donations as well as the foresight of city leaders allowed for the acquisition of park land, particularly after the formation of the park department in 1909. Local architects and such well-known names as George E. Kessler, Hare and Hare, Philip Johnson, and Lawrence Halprin have left a rich legacy of nationally recognized parks and recreational amenities. These include the Fort Worth Zoo, Fort Worth Botanic Garden, the Water Gardens, Heritage Plaza, Fort Worth Nature Center and Refuge, and Fort Woof, the city's first dog park.
