Poetry. "THE BOOK OF SHARKS is an accomplishment at the micro and macro level. Rob Carney has crafted lines that you'll want to save for your next tattoo inside of efficient poems that touch on creation myth, forgotten industries, and slices of life in villages he manufactures with a creator's divine spark. All of this works on its own inside of a larger, complex quilt that he has woven into an intricate pattern

that revisits themes, finishes stories, and reminds you that THE BOOK OF SHARKS is a larger poem that is greater than just its sharpened teeth."--Jesse Parent "In precise, sharp lines, Rob Carney's THE BOOK OF SHARKS builds and interrogates myth and myth-makers, turning to sharks to also turn inward and outward, exploring one's purpose and place and the stories one tells to make meaning. Here, poems wash out and return like the tides they describe, inviting the reader to feel their weight, as if 'to disappear under the stories / as though they were waves.' In the end, whether in water, sky, or story, Carney invites us to consider the essential motivation of 'moving, arriving, being full,' what it means to seek."--Callista Buchen ""Some say sharks are the ocean's anger at us for being in its future,' writes Rob Carney. I say poems are sharks' way of forgiving us for the soup, the necklaces, the movies, and the

mascots. And, let's not even mention climate change. Rob Carney's trenchant, probing poems circle around the self, not so much sensing blood but, perhaps even more dangerously, searching for understanding. Part confession, part documentation, part meditation, these smartly crafted lyrics explore how and why we have and have not allowed sharks (metaphors for so many things) to swim into our lives. This is a major effort from a talented poet."--Dean Rader "In his ambitious collection, THE BOOK OF SHARKS, Rob Carney reimagines the human world and facets of contemporary society by creating a mythology and origin story that correct the erroneous legend of sharks. In building a new lens through which to view the sea and its most vilified species, Carney opens up a new way to conceive of art, life, storytelling, and the connections among living creatures in the

sea, on land, and among the stars. 'Some say sharks are the ocean's anger,' he repeats in two poems, and later--as the collection evolves--they become 'the ocean's blueprint.' In this collection, comprised of seven sections, containing seven poems each, Carney weaves structure and symbolism to reinforce his creation myth; correction and etymology to reconfigure historical facts; and repetition of images and phrases to place these poems--all without titles, bleeding poignantly into one another as part of an ongoing narrative or interconnected species--in the epic tradition. Here we are offered a sympathetic view of sharks, an alternative way to see constellations and their corresponding myths, and a new foundation from which to begin our lives and our stories. Carney's speaker demands that we reexamine what is actually dangerous versus what's been stereotyped so, and most of all

he begs us to see ourselves new, 'to bear in mind / we aren't the measure of Creation. Just a part.'"--Lisa Fay Coutley

When the United States entered World War I in 1917, thousands of African-American men volunteered to fight for a country that granted them only limited civil rights. Many from New York City joined the 15th N.Y. Infantry, a National Guard regiment later designated the 369th U.S. Infantry. Led by mostly inexperienced white and black officers, these men not only received little instruction at their training camp in South Carolina but

were frequent victims of racial harassment from both civilians and their white comrades. Once in France, they initially served as laborers, all while chafing to prove their worth as American soldiers. Then they got their chance. The 369th became one of the few U.S. units that American commanding general John J. Pershing agreed to let serve under French command. Donning French uniforms and taking up French rifles, the men of the 369th fought valiantly alongside French Moroccans and held one of the widest sectors on the Western Front. The entire regiment was awarded the Croix de Guerre, the French government's highest military honor. Stephen L. Harris's accounts of the valor of a number of individual soldiers make for exciting reading, especially

that of Henry Johnson, who defended himself against an entire German squad with a large knife. After reading this book, you will know why the Germans feared the black men of the 369th and why the French called them hell fighters. "

This is a report on the follow-up activities conducted for the 1997 NASA Summer Teacher Enrichment Program (STEP), which was held at the George C. Marshall Space Flight Center (MSFC) for the seventh consecutive year.

The program was conducted as a six-week session with 17 sixth through twelfth grade math and science teachers from a six-state region (Alabama, Arkansas, Iowa, Louisiana, Mississippi and Missouri). The program began on June 8, 1997, and ended on July 25, 1997. The long-term objectives of the program are to: increase the nation's scientific and

technical talent pool with a special emphasis on underrepresented groups, improve the quality of pre-college math and science education, improve math and science literacy, and improve NASA's and pre-college education's understandings of each other's operating environments and needs. Short-term measurable objectives for the MSFC STEP are to: improve the teachers' content and pedagogy knowledge in science and/or mathematics, integrate applications from the teachers' STEP laboratory experiences into science and math curricula, increase the teachers' use of instructional technology, enhance the teachers' leadership skills by requiring them to present workshops and/or inservice programs for other teachers, require the support of the participating teacher(s) by the local school administration through a written commitment, and create networks and partnerships within the

education community, both pre-college and college. The follow-up activities for the 1997 STEP included the following: academic-year questionnaire, site visits, academic-year workshop, verification of commitment of support, and additional NASA support. Welcome to Beyond, where the gravestones have no birth dates, and the residents are dying... A new series from the author of the popular Promise McNeal Mysteries... Looking For Ona introduces Paula Vega, whose plan for surviving Atlanta's brutal summer is to complete her latest steamy romance novel, send it to her editor, and camp out by the pool. Then her best friend, comic strip illustrator Ben Faraday, shows her a cryptic video staring his

mother, who happens to be Paula's editor, and pool lounging is off the table. Instead, Paula and Ben drive to the North Carolina Mountains to find a town not listed on the map, located on a lake where-after seventy years of being underwater-a mysterious island is rising, and the truth about a two-hundred-year-old curse, and a relative who died from not-so-natural causes.

Written by leaders in the addictions field, 100 authors from six countries, this handbook is a thoroughly comprehensive resource. Philosophical and legal issues are addressed, while conceptual underpinnings are provided through explanations of appetitive motivation, incentive sensitization, reward

deficiency, and behavioral economics theories. Major clinical and research methods are clearly mapped out (e.g. MRI, behavioral economics, interview assessments, and qualitative approaches), outlining their strengths and weaknesses, giving the reader the tools needed to guide their research and practice aims. The etiology of addiction at various levels of analysis is discussed, including neurobiology, cognition, groups, culture, and environment, which simultaneously lays out the foundations and high-level discourse to serve both novice and expert researchers and clinicians. Importantly, the volume explores the prevention and treatment

of such addictions as alcohol, tobacco, novel drugs, food, gambling, sex, work, shopping, the internet, and several seldom-investigated behaviors (e.g. love, tanning, or exercise).

The care of the critically ill or injured child begins with timely, prompt, and aggressive res-citation and stabilization. Ideally, stabilization should occur before the onset of organ failure in order to achieve the best possible outcomes. In the following pages, an international panel of experts provides an in-depth discussion of the early recognition, resuscitation, and stabilization of the critically ill or injured child. Once again, we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe. Derek S. Wheeler Hector R. Wong Thomas P. Shanley V Preface to Pediatric Critical Care Medicine: Basic Science and Clinical Evidence The ? eld of critical care medicine is growing at a tremendous pace, and tremendous

advances in the understanding of critical illness have been realized in the last decade. My family has benefited from some of the technological and scientific advances made in the care of critically ill children. My son Ryan was born during my third year of medical school. By some peculiar happenstance, I was nearing completion of a 4-week rotation in the newborn intensive care unit (NICU). The head of the pediatrics clerkship was kind enough to let me have a few days off around the time of the delivery—my wife, Cathy, was 2 weeks past her due date and had been scheduled for elective induction.

250 Thai Girls by Age 25, A True Story from South East Asia is a true-to-life adventure that can be relived from beginning to end. The story begins with the allure of travel and the need for new experiences. Sex, drugs, alcohol and debauchery are the name of the game, and the impetus behind this historic modern day journey. Bangkok, Chiang Mai, Udon Thani, Cambodia, Laos, and the pristine Andaman beaches of Kho Lipe are featured in this bold and daring travel adventure. The author narrowly escapes death at the hands of a knife wielding Cambodian mugger. He is violently robbed by a taxi driver in Bangkok. Held up by the Laos Police for running at a late night roadblock with a teen prostitute. And narrowly escapes a King Cobra in the jungles of Northern Thailand. This non-fiction story is as up to date, authentic, and original as anything in its genre. The

names, places, and people from this wild South East Asian sexcapade have not been altered in any way. This book has the potential to spark a new generation of hedonistic travelers looking to better understand themselves, and where to go to make that possible. Once you go Asian, you will never go Caucasian. Join the author on his solo travels while he searches out every nook and cranny during his first year in South East Asia.

Few would dispute the power of climate change to lead to profoundly destructive weather events. At the same time, the possibility of climate change as a consequence—or even a cause—of criminal events is far less recognized. As the earth grows warmer, issues regarding land use, water rights, bio-security, and food production and distribution will continue to have far-reaching impact, and produce more opportunity for

offenses by individuals and groups as well as political and corporate entities. In *Climate Change from a Criminological Perspective*, a panel of pioneering green criminologists investigates an increasingly complex chain of ecological causes and effects. Illegal acts are analyzed as they contribute to environmental decline (e.g., wildlife poaching) or result from ecological distress (e.g., survival-related theft). Regulatory and other interventions are critiqued, concepts of environmental harm refined, and new research methodologies called for. And while individual events described are mainly local, the contributors keep the global picture, and substantial questions about human rights and social relationships, firmly in mind. Topics featured include: Global warming as corporate crime. Climate change and the courts: U.S. and global views. Climate change, natural disasters, and gender inequality. The roles

and responsibilities of environmental enforcement networks. A sociocultural perspective on climate change denial. PLUS: instructive in-depth chapters on criminological aspects of Hurricane Katrina and the Japanese nuclear disaster. A volume of considerable timeliness and vision, *Climate Change from a Criminological Perspective* will be read and discussed, and will inspire action, by researchers in criminology, criminal justice, environmental studies, and related disciplines, as well as policymakers.

The widow of "American Sniper" Chris Kyle shares

their private story: an unforgettable testament to the power of love and faith in the face of war and unimaginable loss--and a moving tribute to a man whose true heroism ran even deeper than the legend. In early 2013, Taya Kyle and her husband Chris were the happiest they ever had been. Their decade-long marriage had survived years of war that took Chris, a U.S. Navy SEAL, away from Taya and their two children for agonizingly long stretches while he put his life on the line in many major battles of the Iraq War. After struggling to readjust to life out of the military, Chris had found new purpose in redirecting his lifelong dedication to service to supporting veterans and their families. Their love had deepened, and, most special of all, their family was whole,

finally. Then, the unthinkable. On February 2, 2013, Chris and his friend Chad Littlefield were killed while attempting to help a troubled vet. The life Chris and Taya fought so hard to build together was shattered. In an instant, Taya became a single parent of two. A widow. A young woman facing the rest of her life without the man she loved. Chris and Taya's remarkable story has captivated millions through Clint Eastwood's blockbuster, Academy Award-winning film *American Sniper*, starring Bradley Cooper as Chris and Sienna Miller as Taya, and because of Chris's bestselling memoir, in which Taya contributed passages that formed the book's emotional core. Now, with trusted collaborator Jim DeFelice, Taya writes in never-before-told detail about the hours, days, and months after his shocking death when grief threatened to overwhelm her. Then there were wearying battles to protect her husband's legacy and reputation. And yet throughout, friendship, family, and a deepening faith were lifelines that sustained her and the kids when the sorrow became too much. Two years after her husband's tragic death, Taya has found renewed meaning and connection to Chris by advancing their shared mission of "serving those who serve others," particularly military and first-responder families. She and the children now are embracing a new future, one that honors the past but also looks forward with hope, gratitude, and joy. *American Wife* is one of the most remarkable memoirs of the year -- a universal chronicle of love and

heartbreak, service and
sacrifice, faith and purpose
that will inspire every
reader.
