Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense

Secretary Donald Rumsfeld have all pointed out that we need to be able

to tell the difference between real and assumed knowledge. The

systematic review is a scientific tool that can help with this

difficult task. It can help, for example, with appraising,

summarising, and communicating the results and implications of

otherwise unmanageable quantities of data. This book, written by two

highly-respected social scientists, provides an overview of systematic

literature review methods: Outlining the rationale and methods of

systematic reviews; Giving worked examples from social science and

other fields; Applying the practice to all social science disciplines;

It requires no previous knowledge, but takes the reader through the

process stage by stage; Drawing on examples from such diverse fields

as psychology, criminology, education, transport, social welfare,

public health, and housing and urban policy, among others. Including

detailed sections on assessing the quality of both quantitative, and

qualitative research; searching for evidence in the social sciences;

meta-analytic and other methods of evidence synthesis; publication

bias; heterogeneity; and approaches to dissemination.

School-Based Family Counseling with Refugees and Immigrants focuses on the practical application of School-Based Family Counseling (SBFC) with refugee and immigrant populations. Emphasizing collaboration, mutual assistance, dialogue, and joint problem-solving, SBFC takes a systems approach that stresses the integration of school, family, and community interventions; the three most important systems that affect the lives of children. Through case studies, the book explains how to design and implement integrated SBFC interventions for refugee and immigrant populations in an explicit manner. The book's practical, how-to approach is suitable for novice and experienced practitioners alike.
