Before Palm Pilots and iPods, PCs and  
laptops, the term "computer" referred to  
the people who did scientific calculations  
by hand. These workers were neither  
calculating geniuses nor idiot savants but  
knowledgeable people who, in other  
circumstances, might have become  
scientists in their own right. When  
Computers Were Human represents the  
first in-depth account of this little-known,  
200-year epoch in the history of science  
and technology. Beginning with the story  
of his own grandmother, who was trained

---

as a human computer, David Alan Grier provides a poignant introduction to the wider world of women and men who did the hard computational labor of science. His grandmother's casual remark, "I wish I'd used my calculus," hinted at a career deferred and an education forgotten, a secret life unappreciated; like many highly educated women of her generation, she studied to become a human computer because nothing else would offer her a place in the scientific world. The book begins with the return of Halley's comet in 1758 and the effort of three French astronomers to compute its orbit. It ends four cycles later, with a UNIVAC electronic computer projecting the 1986 orbit. In between, Grier tells us about the surveyors of the French Revolution, describes the calculating machines of Charles Babbage, and guides the reader

through the Great Depression to marvel at the giant computing room of the Works Progress Administration. *When Computers Were Human* is the sad but lyrical story of workers who gladly did the hard labor of research calculation in the hope that they might be part of the scientific community. In the end, they were rewarded by a new electronic machine that took the place and the name of those who were, once, the computers.

regular cash dividends annually for the past ten or more consecutive years. These are truly remarkable companies. The average total return of these Dividend Achiever companies has outperformed the S&P 500 for the last 10 years. "Where should investors start looking for high-quality dividend paying companies? Research from Mergent has an exclusive list of companies that have increased their dividends every year for the past 10 years." —Steve Liesman, CNBC, senior economics reporters on Squakbox Build a Winning Portfolio From our Dividend Achievers, you can put together an extraordinary, diversified portfolio. They include large capitalization, mid-cap, and small-cap companies. The companies represent more than 50 different industries, from consumer goods to real estate to utilities. For each Dividend Achiever Company, our handbook provides a full-page profile with in-depth investment criteria, including a stock performance chart, dividend record, business description, seven years of financial results and ratios, analysis of recent developments and more. "[Mergent's Dividend Achievers] is the valuable source for high-quality stocks that pay great dividends" — Len Kuker, Senior Vice President, Morgan Stanley Unique Rankings Companies are classified by industry. This edition includes numerous valuable rankings, such as 10-year average annual dividend growth rate, one, three, and five year total returns, top 20 return on equity and return on assets along with top 20 rankings by revenue, net income, total assets, long-term and short-term price scores, highest and lowest P/E ratios and more! A Great Investment Has

Become Even Better And now, with new tax law changes slashing dividend taxes, investing in Dividend Achiever companies has never been better! Our Dividend Achievers will provide low-taxed income today and perhaps low-taxed capital gains tomorrow. Historically, dividend income has been taxed at your highest rate. Under the prior tax law, as much as 38.6% of dividend income could go to the IRS. The 2003 tax act changed the rules. Now, corporate dividends paid to individuals generally are taxed at ultra-low tax rates. Most investors will pay only 15% tax on dividend income. Investors in the lowest federal tax brackets will pay only 5% tax on dividends. This rate may apply to

---

retirees whose income drops after they stop working. In 2008, those low-bracket taxpayers will owe no federal income tax on dividends they receive. What's more, if you need to sell your dividend-paying stocks, any long-term gains will qualify for those same bargain tax rates: 15%, 5%, or even 0% in 2008. How Does a Company Become a Dividend Achiever? Many thousands of companies pay dividends to shareholders. Fewer than 300 U.S. companies qualified as Dividend Achievers in 2003. In fact, only 2.5% of all the publicly-traded, dividend-paying U.S. companies qualify as Dividend Achievers! To make our final cut, only high-quality companies that have increased their regular dividends

for 10 years in a row are chosen from an exclusive list. That's right...during the boom times of the late 1990s and the struggles of the early 21st century, our Dividend Achievers have steadily taken in more cash and paid higher dividends to investors. In fact, most of our Dividend Achievers have more than 20 years of higher dividends. Truly, the companies on our list have proven to be the top tier of U.S. industry. Order Your Copy Today For this edition of Mergent's Dividend Achievers, our analysts have updated the profiles on approximately 300 Dividend Achievers, which includes high-yielding companies that can produce higher returns, after tax, than municipal bonds.
