"Kerouac's best book."--TIME Dr. Sax is a haunting novel of deeply felt adolescence, Jack Kerouac tells the story of Jack Duluoz, a French-Canadian boy growing up in Kerouac's own birthplace, the dingy factory town of Lowell, Massachusetts. There, Dr. Sax, with his flowing

cape, slouched hat, and insinuating leer, is chief among the many ghosts and demons that populate Jack's fantasy world. Deftly mingling memory and dream, Kerouac captures the accents and textures of his boyhood in Lowell in this novel of a cryptic, apocalyptic hipster phantom that he once described as "the greatest book I ever wrote, or that I will write." Security and Loss Prevention Delmar Pub This is a print on demand edition of a hard to find

Over the past decade, four major developments in global economic integration have shaped trade policy and the economic performance of countries within the Middle East and North Africa region: the emergence of global supply chains, the growth of trade in services, the rise of China and India as major international trading powers, and regional integration. These developments, along with the labor and natural resource endowments of particular countries (some are resource-poor but labor-abundant, some resource-rich and labor-abundant, and some resource-rich and labor-importing), have influenced export diversification outcomes across the region. Yet these countries may not be taking full advantage of all of the opportunities the four new trends offer to them. 'Trade Competitiveness of the Middle East and North Africa: Policies for Export Diversification' examines the region's trade policy agendas and their results by focusing on the countries' response to these four key developments in international trade. As the region recovers from the global financial and economic crises, the book identifies reforms that could

allow countries to further strengthen global production networks, benefit more from trade in services, better compete in external markets to face the rise of China and India, and reach the full potential of regional integration. If thoroughly implemented, especially by oil exporters, all of these reforms could help boost growth and job creation in the region. Trade Competitiveness of the Middle East and North Africa Butterworth-Heinemann  
Hacker extraordinaire Kevin Mitnick delivers the explosive encore to his bestselling The Art of Deception Kevin Mitnick, the world's most celebrated hacker, now devotes his life to helping businesses and governments combat data thieves, cybervandals, and other malicious computer intruders. In his bestselling The Art of Deception, Mitnick presented fictionalized case studies that illustrated how savvy computer crackers use "social engineering" to compromise even the most technically secure computer systems. Now, in his new book, Mitnick goes one step further, offering hair-raising stories of real-life computer break-ins-and showing how the victims could have

prevented them. Mitnick's reputation within the hacker community gave him unique credibility with the perpetrators of these crimes, who freely shared their stories with him-and whose exploits Mitnick now reveals in detail for the first time, including: A group of friends who won nearly a million dollars in Las Vegas by reverse-engineering slot machines Two teenagers who were persuaded by terrorists to hack into the Lockheed Martin computer systems Two convicts who joined forces to become hackers inside a Texas prison A "Robin Hood" hacker who penetrated the computer systems of many prominent companies-and then told them how he gained access With riveting "you are there" descriptions of real computer break-ins, indispensable tips on countermeasures security professionals need to implement now, and Mitnick's own acerbic commentary on the crimes he describes, this book is sure to reach a wide audience-and attract the attention of both law enforcement agencies and the media.

The ultimate tool for understanding, investigating

and preventing fraud Fraud is an evil with a life of its own that leaves a financial, repetitional, and emotional toll on its victims. While monumental scandals, such as Enron, WorldCom, and Madoff's Ponzi scheme make the front pages, fraud is a daily occurrence impacting companies and individuals alike. Faces of Fraud reveals must-know characteristics of fraudsters and the skills needed to outwit them. Recognized Fraud Fighting Expert Martin Biegelman draws from his 40 years of experience fighting fraud to profile not only the key traits fraudsters share, but also the qualities fraud examiners must possess to be successful. Each chapter contains stories from actual cases that the author investigated Profiles the must-know characteristics of fraudsters and the skills you'll need to outwit them Reveals the traits of accomplished fraud examiners Explores the best practices in fraud detection, investigation and prevention to cultivate in order to maximize success Written by fraud fighting expert Martin T. Biegelman Although fraud will never be completely eradicated, there is much that can be done to reduce the number and size of frauds

that take place in any organization. Boiling down the key lessons the author has culled from his long career, Faces of Fraud entertains and informs with stories from real cases the author investigated over his long career, and imparts useful tips you can start using right away in the fraud examination field. Principles of Comparative Politics CQ Press Principles of Comparative Politics offers the most comprehensive and up-to-date introduction to comparative inquiry, research, and scholarship. In this thoroughly revised Third Edition, students now have an even better guide to cross-national comparison and why it matters. The new edition retains a focus on the enduring questions with which scholars grapple, the issues about which consensus has started to emerge, and the tools comparativists use to get at the complex problems in the field. Among other things, the updates to this edition include a thoroughly-revised chapter on dictatorships that incorporates a discussion of the two fundamental problems of authoritarian rule: authoritarian power-sharing and authoritarian control; a revised chapter on culture and democracy that includes a more extensive examination of cultural modernization theory and a new overview of survey

methods for addressing sensitive topics; a new section on issues related to electoral integrity; an expanded assessment of different forms of representation; and a new intuitive take on statistical analyses that provides a clearer explanation of how to interpret regression results. Examples from the gender and politics literature have been incorporated into various chapters, the Problems sections at the end of each chapter have been expanded, and the empirical examples and data on various types of institutions have been updated. Online videos and tutorials are available to address some of the more methodological components discussed in the book. The authors have thoughtfully streamlined chapters to better focus attention on key topics. *Telling Lies* Scarecrow Press Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? *World Development Report 2017: Governance and the Law* addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex

political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded

participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.

Diabetes has become a worldwide health problem, the global estimated prevalence approaches ten percent and the burden of this disease in terms of morbidity and mortality is unprecedented. The advances acquired through the knowledge of the mechanisms of the disease and the variety of therapeutic approaches contrast with the inability of private and public health systems in underdeveloped and even developed countries to achieve the goals of treatment. This paradox has been described in many sources: the surge of scientific advances contrast with an unprecedented amount of human suffering. Thus, a patient centered and an evidence based approach with the capacity to produce

measurable clinical and economic outcomes is required. The purpose of this textbook is multiple: to offer a comprehensive resource covering all aspects of outpatient management; to address diabetes as a health problem from an epidemiological, economic and clinical perspective; to discuss the role of social determinants of health on the worldwide increase in diabetes; to highlight the challenges and obstacles in providing adequate care; and to outline a multidisciplinary approach to management in which medical visits retain their importance as part of a team comprising the patient, his or her family and a multidisciplinary group of health professionals who are able to move beyond the traditional approach of diabetes as a disease and greatly improve outcomes.

Great is no longer good enough. Beyond Great delivers a powerful new playbook of 9 core strategies to thrive in a post-COVID world where all the rules of the game are being re-written. Beyond Great answers to two fundamental questions which face business

leaders today in a world shaped by daunting and disruptive technological, economic, and social change. First, what is outstanding performance in this new volatile era? Second, how do we build competitive advantage in a world with new and often uncertain rules? Supported by years of research and hands-on consulting practice, this book presents a comprehensive framework for building a high performing, resilient, adaptive, and socially responsible global company. The book begins by taking an incisive look at these disruptive forces transforming globalization, including economic nationalism; the boom in data flows and digital commerce; the rise of China; heightened public concerns about capitalism and the environment; and the emergence of borderless communities of digitally connected consumers. Distilled from the study of hundreds of companies and interviews with dozens of business leaders, the authors have distilled nine core strategies – the new winning playbook of the 21st century. Beyond Great argues that business leaders today must lead with a new kind of openness, flexibility and light-footedness, constantly layering in new strategies and operational norms atop existing ones to allow for "always-on" transformation. Leaders must master a whole new set of rules

Global Trends 2040 Edward Elgar Publishing

"The ongoing COVID-19 pandemic marks the most significant, singular global

disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will

find this report, with colored graphs, essential reading.
