Is your heart craving authentic community? Have you been looking for a deeper understanding of the Christian faith and what it means to follow in the footsteps of Jesus? Thrive just might be the answer. Thrive is an emerging process for planting churches and missional communities that engages God's mission in the Way of Jesus. Based on the Jesus Model, Thrive provides a three year structured process for gathering together as a tribe for the sake of restoration and discovering what it means to be human. It's a simple means for participating in what God is already doing. The Jesus Model invites us to begin with a tribe of twelve intentional participants gathered together to create a space where intentional grace is true. It creates a context for creating a wholistic structure for restoration, spiritual formation, and growth. The Leadership Manual provides the basic understanding for creating and leading a tribe. The first part of this manual will explore the Thrive process, how to create a tribe, the specific protocols and support elements, and frequently asked questions. It also includes the six elements, or conversations that support the development of mission, the process and the tribe. These elements include: cultivate a tribe, engage the mission, follow the way, seek the kingdom, explore the story, and go and make disciples

A debut, interlinked collection of stories exploring the primal nature of women's grief—offering insight into the profound experience of loss and the absurd ways in which we seek control in an unruly world. Seamlessly shifting between the speculative and the blindingly real, balancing the bizarre with the subtle brutality of the mundane, *A Manual for How to Love Us* is a tender portrait of women trying their best to survive, love, and find genuine meaning in the aftermath of loss. In these unconventional and unpredictably connected stories, Erin Slaughter shatters the stereotype of the soft-spoken, sorrowful woman in distress, queering the domestic and honoring the feral in all of us. In each story, grieving women embrace their wildest impulses as they attempt to master their lives: one woman becomes a “gazer” at a fraternity house, another slowly moves into her otherworldly stained-glass art, a couple speaks only in their basement's black box, and a thurple must decide what to do when one partner disappears. The women in Erin Slaughter's stories suffer messy breaks, whisper secrets to the ghosts tangled in the knots of their hair, eat raw meat to commune with their inner wolves, and build deadly MLM schemes along the Gulf Coast. Set across oft-overlooked towns in the American South, *A Manual for How to Love Us* spotlights women who are living on the brink and clinging to its precipitous edge. Lyrical and surprisingly humorous, *A Manual for How to Love Us* is an exciting debut that reveals the sticky complications of living in a body, in all its grotesquerie and glory.

Tanto si desea comprarse su primera mountain bike y busca asesoramiento como si es un biker curtido y desea conocer nuevas técnicas de competición, en esta obra encontrará todo lo que necesita saber. Gracias a las secciones exhaustivas que describen las técnicas básicas, el equipo esencial, los métodos para mantener en buenas condiciones la bicicleta y los programas de entrenamiento, este libro responderá a todas sus preguntas. En esta guía, dirigida a entusiastas del mountain bike de todo tipo, encontrará también información detallada sobre temas de seguridad, nutrición, dispositivos de última tecnología, entrenamiento de competición y mantenimiento del equipo. Tim

Brink inició su pasión por las bicicletas y el ciclismo a los 12 años. Al carecer del talento físico necesario para convertirse en el nuevo Eddy Merckx, optó por dedicarse al negocio ciclista. Durante veinticinco años ha regentado tiendas de bicicletas y ha trabajado como mecánico de estas en dos continentes, ha competido como biker semiprofesional y ha llevado la distribución de una importante marca de ciclismo. Además, es editor adjunto de la edición sudafricana de la revista Bicycling, la que más ejemplares vende en todo el mundo. Sus trabajos también han sido publicados en Men's Health y en otras revistas corporativas.

This book is the first to bring together the actual practices and procedures in all the major users of anti-dumping. The countries surveyed include all the so-called 'traditional' users (Australia, Canada, the EU, New Zealand, South Africa, and the United States) as well as the leading 'new' users (Argentina, Brazil, China, India, Korea, Mexico, and Turkey). The book provides not only an overview of each of the systems considered but also a detailed reference to the way different jurisdictions have handled specific issues. In addition, the structure for each chapter is virtually identical, allowing for a ready comparative analysis of various topics. These topics include the following: applicable legislation, regulations, prescribed guidelines and procedures; decision-making process and time-line; the likelihood of an investigation leading to the imposition of measures; statistics 1995 – 2011 with details of actual investigations and duties imposed; threshold of injury and calculation of non-injurious price; establishment of causal link; verification reports, hearings, access to information, and other procedural issues; reviews and refunds; and anti-circumvention measures. An introductory chapter provides a comparative statistical analysis of the use of anti-dumping by the thirteen countries, highlighting key features of anti-dumping systems in a comparative way. The introduction also assesses the important impacts of China's accession to the WTO in 2001 and of the economic and financial crisis of 2008 – 2009, discusses the treatment of non-market economies, and notes emerging tendencies in anti-dumping reform. This is an invaluable work on a key area in trade (and competition) law, written by a team of well-known experts. With its comprehensive

and practical format, the book will be of great interest to practitioners dealing with anti-dumping cases, including trade law practitioners who may have to defend anti-dumping cases in different jurisdictions, attorneys in international trade law and competition law, government officials, academics, and researchers.

In December 2007, following a bitterly disputed presidential election, violence rippled out across Kenya, exposing entrenched ethnic divisions fuelled by social and economic exclusion, corruption, and winner-takes-all politics. This book describes the remarkable intervention of the Panel of Eminent African Personalities. Convened by the African Union while violence was still spreading, Kofi Annan, Gra ç a Machel and Benjamin Mkapa were asked to mediate between the parties, create the conditions for peace, and negotiate a political settlement that would tackle the root causes of conflict, mend Kenya ' s failing institutions and reduce its profound inequalities. With the advantage of an insiders ' account, Back from the Brink describes how the Panel deployed their diplomatic and peace-making skills to stop the bloodshed, and how, from 2008 to 2013, Annan, Machel and Mkapa remained deeply engaged in Kenya ' s efforts to build a durable peace.

Historically, the discovery of tools, or evidence that tools have been used, has been taken as proof of human activity; certainly the invention and spread of new tools has been a critical marker of human progress and has increased our ability to observe, measure, and understand the physical world. In astronomy the tools are telescopes and the optical and electronic instruments that support them. The use of the telescope by Galileo marked the beginning of a new and productive way to study and understand the universe in which we live. The effects of this new tool on what we can see, and how we see ourselves, are well known. However, after almost four centuries of developing ever more sensitive and subtle instruments as tools for astronomy, it might have been expected that only a few minor improvements would remain to be made, or that possibly the law of diminishing returns would have taken effect. On the contrary, the new instruments and ideas for new instruments described in this book make it clear that the rate of progress has not diminished, and that this subject is still as exciting and productive as ever.

Instrumentation for Ground-Based Optical Astronomy was chosen as the theme for the Ninth Santa Cruz Summer Workshop in Astronomy and Astrophysics.

A sheer drop, a road winding round a volcano, a piece of earth subject to tremors - these are the characteristic sites for the poems in this book, often on the eve of, or in the aftermath of catastrophe. The poems thread their way through this precarious landscape with humour, curiosity, and great agility. Increasingly renowned at readings and in literary magazines, Jamie McKendrick speaks with greater confidence and clarity in this second collection of poems, which follows his acclaimed 1991 volume, *The Sirocco Room* (#5.99).

As the Democratic governor of South Carolina during the height of the civil rights movement, Robert E. McNair faced the task of leading the state through the dismantling of its pervasive Jim Crow culture. Despite the obstacles, McNair was able to navigate a moderate course away from a past dominated by an old-guard oligarchy toward a more pragmatic, inclusive, and prosperous era. *South Carolina at the Brink* is the first biography of this remarkable statesman, as well as a history of the tumultuous times in which he governed. In telling McNair's story, Philip G. Grose recounts historic moments of epic turbulence, chronicles the development of the man himself, and maps the course of action that defined his leadership. A native of Berkeley County's Hell Hole Swamp, McNair was a decorated naval commander in the Philippines during World War II, then a small-town attorney, a state legislator, and lieutenant governor, before serving in the state's highest office from 1965-1971. Each role taught him the value of tolerance and perseverance and informed the choices he made at the helm of state government. violence and conflict that marked the onset of desegregation and of protest against the war in Vietnam: the tragic shootings in Orangeburg in February 1968, the 113-day strike at the Medical College in Charleston in 1969,

violence at high schools in Columbia and Lamar in 1970, and antiwar protests on the University of South Carolina campus in 1970. These events remain the most vivid memories of the period, but McNair's lasting legacy is his remarkable ability to affect peaceful solutions and, ultimately, compliance with federal court rulings. Grose contends that it was McNair's decisive actions and reactions to crises that steered South Carolina clear of the larger tragedies of neighbouring states during this period and allowed the governor to achieve much improvement to the condition of the state's education system and economy. Grose's narrative draws from an extensive oral history project on the McNair administration conducted by the University of South Carolina and the South Carolina Department of Archives and History, as well as recent interviews with key participants.

"Security is mostly a superstition. It does not exist in nature, nor do the children of men as a whole experience it. Avoiding danger is no safer in the long run than outright exposure. Life is either a daring adventure, or nothing." -Helen Keller

Danger is around us all the time. If we feel secure it is because we have chosen to ignore the threat or we feel we have taken steps to reduce the threat. Everything we do, however, is merely a deterrent. There are no guarantees. Threat is always present. It is simply a matter of degree. Threats come in many forms and they all eat away at our fundamental sense of security. Personal and professional security focuses on awareness and preparation. Knowledge is power. Those who are aware and prepared are far more likely to survive sudden, unexpected threats. Luck as they say, is when preparation meets opportunity. What does it take to be a prepared security professional? The terrorist attacks on United States soil on September 11, 2001 illustrate how crucial it is that security be prepared and effective. Those attacks happened because we let our guard down, and the ripple effects have altered our society forever. How great a price

must we pay in terms of reduced civil liberties to feel safe now? Such questions may be difficult to define but the fundamental duties and responsibilities of security officers are not. If we expect to overcome threats we must all be on the same page. That is why this book is an important tool in society's ongoing mission to raise the bar in the security profession. Preparation requires training and the journey begins here. -Michael James Jaquish

Addressing issues of continuing if not heightened relevance to contemporary debate, *America at the Brink of Empire* explores the foreign policy leadership of Dean Rusk and Henry Kissinger regarding the extent of the United States' mission to insure a stable world order. Lawrence W. Serewicz argues that in the Vietnam conflict the United States experienced an identity crisis—a near Machiavellian moment, to use the concept of J. G. A. Pocock—whereby America came close to assuming an imperial role, stretching the country to the limits of its identity as a republic. Serewicz offers a revealing look at the parts played by Rusk and Kissinger—and President Lyndon Johnson—in bringing the nation to the brink of empire in the years 1963–75. As a true believer in liberal internationalism, Rusk set the stage by defining the war in Vietnam as a threat to the world order based on the United Nations security system created after World War II. Johnson kept an open-ended commitment in Vietnam without a clear goal in sight even as he pursued the ambitious domestic reforms of the Great Society. In refusing to choose between either an imperial mission or a true republican position for the nation, he brought it perilously close to becoming an empire, ultimately failing to achieve his goals either at home or abroad. Kissinger corrected for Johnson's overreach, implementing a pragmatic realism based upon the principle that the United States is an ordinary country—a republic, not an empire—within the international community and therefore must balance its commitments with its resources. In concluding, Serewicz reflects on the

continuing relevance of the Machiavellian moment for the United States by observing the differences and similarities between the presidencies of Johnson and George W. Bush. *America at the Brink of Empire* illuminates the far-reaching consequences of Rusk's and Kissinger's widely divergent foreign policy philosophies and outlines the tension that a statesman must reconcile between a republican government and the maintenance of a stable world order.
