Este livro apresenta uma metodologia de projeto de produto</p>	<p>orientado para as necessidades do consumidor e do mercado. A sua abordagem é bastante prática, com os principais conceitos organizados em forma de "ferramentas" para serem utilizados como produtos simples, encomendados por instrumentos durante a atividade de projeto. A teoria é ilustrada com diversos casos de aplicação prática. Todos eles foram baseados em projetos desenvolvidos pelo próprio autor e sua equipe do Design Research Centre, ligado à Universidade de Brunel, Inglaterra. Product Design: Practical Methods for the Systematic Development of New Products covers the entire new product development process, from market research through concept design, embodiment design, design for manufacture, and product launch. Systematic and practical in its approach, the text offers both a structured management framework for product development and an extensive range of specific design methods. Chapters feature "Design Toolkits" that provide detailed guidance on systematic design methods, present examples with familiar products, and conclude with reviews of key concepts. This major text aims to turn the often haphazard and unstructured product design process into a quality-controlled, streamlined, and</p>
