At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

introduction to Middle English literature for those coming fresh to the study of earlier English writing, and as a stimulating examination of the themes, traditions and the literary achievement of a number of particularly original and interesting authors. In addition to detailed and sensitive treatment of Chaucer's major works, the book includes chapters on his chief contemporaries, such as John Gower, William Langland and the Gawain-poet. It also examines the often underrated contribution to the English literary tradition of his

successors John Lydgate and Thomas Hoccleve, as well as the interesting and original work of the Scottish poets, Robert Henryson, William Dunbar and Gavin Douglas, who also claim Chaucer as their model. Apart from the narrative poetry of Chaucer and his followers, the book also contains chapters on the Middle English lyric; Middle English prose, including Mandeville's travels; the most original and imaginative writings of the Middle English mystics, in particular Julian of Norwich and Margery Kempe; and Thomas Malory's impressive prose compilation of Arthurian

In this fascinating book, Mark Stein examines black British literature, centering on a body of work created by British-based writers with African, South Asian, or Caribbean cultural backgrounds. Linking black British literature to the bildungsroman genre, this study examines the transformative potential inscribed in and induced by a heterogeneous body of texts. Capitalizing on their plural

cultural attachments, these texts portray and purvey the transformation of post-imperial Britain. Stein locates his wide-ranging analysis in both a historical and a literary context. He argues that a cross-cultural and interdisciplinary approach is essential to understanding post-colonial culture and society. The book relates black British literature to ongoing debates about cultural diversity, and thereby offers a way of reading a highly popular but as yet relatively uncharted field of cultural

---

production. With the collapse of its empire, with large-scale immigration from former colonies, and with ever-increasing cultural diversity, Britain underwent a fundamental makeover in the second half of the twentieth century. This volume cogently argues that black British literature is not only a commentator on and a reflector of this makeover, but that it is simultaneously an agent that is integral to the processes of cultural and social change. Conceptualizing the novel of transformation,

this comprehensive study of British black literature provides a compelling analytic framework for charting these processes.

Ethics, Aesthetics, and Politics, 1680-1750 Nineteen Eighty-Four

While the popular talk of English common sense in the eighteenth century might seem a by-product of familiar Enlightenment discourses of rationalism and empiricism, this book argues that terms such as 'common sense' or 'good sense' are not simply synonyms of applied reason. On the contrary, the discourse of common sense is shaped by a defensive impulse against the totalizing intellectual regimes of the Enlightenment and the cultural climate of change they promote, in order to contain the unbounded discursive proliferation of modern learning. Hence, common sense discourse has a vital regulatory function in cultural negotiations of political and intellectual change in eighteenth-century Britain against the backdrop of patriotic national self-concepts.
