From Adelaide in "Guys and Dolls" to Nina in "In the Heights" and Elphaba in "Wicked," female characters in Broadway musicals have belted and crooned their way into the American psyche. In this lively book, Stacy Wolf illuminates the women of American musical theatre--performers, creators, and characters--from the start of the Cold War to the present day, creating a new, feminist history of the genre. The musicals discussed here are among the most beloved in the canon--"West Side Story," "Cabaret," "A Chorus Line," "Phantom of the Opera," and many others--with special emphasis on the blockbuster "Wicked." Along the way, Wolf demonstrates how the musical since the mid-1940s has actually been dominated by women--women onstage, women in the wings, and women offstage as spectators and fans.

A guide to understanding the inner workings and outer limits of technology and why we should never assume that computers always get it right. In *Artificial Unintelligence*, Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems. We are so eager to do everything digitally—hiring, driving, paying bills, even choosing romantic partners—that we have stopped demanding that our technology actually work. Broussard, a software developer and journalist, reminds us that there are fundamental limits to what we can (and should) do with technology. With this book, she offers a guide to understanding the inner workings and outer limits of technology—and issues a warning that we should never assume that computers always get things right. Making a case against technochauvinism—the belief that technology is always the solution—Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia. To prove her point, she undertakes a series of adventures in computer programming. She goes for an alarming ride in a driverless car, concluding “ the cyborg future is not coming any time soon ” ; uses artificial intelligence to investigate why students can't pass standardized tests; deploys machine learning to predict which passengers survived the Titanic disaster; and attempts to repair the U.S. campaign finance system by building AI software. If we understand the limits of what we can do with technology, Broussard tells us, we can make better choices about what we should do with it to make the world better for everyone.

From the 2-time Tony Award-winner and the star of TV ' s *Younger*, funny and intimate stories and reflections about how crafting has kept her sane while navigating the highs and lows of family, love, and show business (and how it can help you, too). Whether she ' s playing an “ age-defying ” book editor on television or dazzling audiences on the Broadway stage, Sutton Foster manages to make it all look easy. How? *Crafting*. From the moment she picked up a cross stitch needle to escape the bullying chorus girls in her early performing days, she was hooked. Cross stitching led to crocheting, crocheting led to collages, which led to drawing, and so much more. Channeling her emotions into her creations centered Sutton as she navigated the significant moments in her life and gave her tangible reminders of her experiences. Now, in this charming and poignant collection, Sutton shares those moments, including her fraught relationship with her agoraphobic mother; a painful divorce splashed on the pages of the tabloids; her struggles with fertility; the thrills she found on the stage during hit plays like *Thoroughly Modern Millie*, *Anything Goes*, and *Violet*; her breakout TV role in *Younger*; and the joy of adopting her daughter, Emily. Accompanying the stories, Sutton has included crochet patterns, recipes, and so much more! Witty and poignant, *Hooked* will leave readers entertained as well as inspire them to pick up their own cross stitch needles and paintbrushes.

From the incomparable Emmy, Grammy, and Tony Award winner, a powerful and revealing autobiography about race, sexuality, art, and healing It ' s easy to be yourself when who and what you are is in vogue. But growing up Black and gay in America has never been easy. Before Billy Porter was slaying red carpets and giving an iconic Emmy-winning performance in the celebrated TV show *Pose*; before he was the groundbreaking Tony and Grammy Award-winning star of Broadway ' s *Kinky Boots*; and before he was an acclaimed recording artist, actor, playwright, director, and all-around legend, Porter was a young boy in Pittsburgh who was seen as different, who didn ' t fit in. At five years old, Porter was sent to therapy to “ fix ” his effeminacy. He was endlessly bullied at school, sexually abused by his stepfather, and criticized at his church. Porter came of age in a world where simply being

himself was a constant struggle. Billy Porter's *Unprotected* is the life story of a singular artist and survivor in his own words. It is the story of a boy whose talent and courage opened doors for him, but only a crack. It is the story of a teenager discovering himself, learning his voice and his craft amidst deep trauma. And it is the story of a young man whose unbreakable determination led him through countless hard times to where he is now; a proud icon who refuses to back down or hide. Porter is a multitalented, multifaceted treasure at the top of his game, and *Unprotected* is a resonant, inspirational story of trauma and healing, shot through with his singular voice.

A Book of Orchestrators and Orchestrations Oxford University Press

"Broadway in the Box shines a television-centric light on the cross-industry presence of a seminal American art form. Over seven chapters, it works to unearth, explore, and analyze pockets of over seventy years of television programming which embraced, nodded toward, and satirized the American musical in its various forms. This concentrated exploration of the genre across American television allows for an explication of America's shifting and at times wavering feelings toward the musical, its songs, and its stars. Further, examining these texts alongside constantly changing and at times intersecting entertainment industries uncovers forms of symbiosis and synergy that linked the cultural and economic futures of the musical across platforms. In the end, Mitzi Gaynor titillating America in a revealing and bejeweled Bob Mackie dress was not just the seventies being the seventies, but a single event reflecting a larger confluence of Broadway, film, Vegas, ratings, genre, and programming trends within a specific television model. Perhaps in a style similar to various Broadway and film retrospectives, *Broadway in the Box* takes individual events and brings them together to craft a larger commentary on American entertainments, economics, and industries. Broadway has always been in the box; someone just needed to plug it in to see what was on"--

How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In *Lifelong Kindergarten*, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and collaborating through remixing, crowdsourcing, and large-scale group

projects (such as a Halloween-themed game called *Night at Dreary Castle*, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before.
