He'd only known her a couple hours, but already he wanted her. Now, if only she wasn't a murder suspect... Detective Brock Transom eyed Nina Jansen across her desk. In the short span of time since the body of her boss had been found, he'd picked up a number of interesting insights. Some had been freely given -- from the crime scene techs and medical examiner, as expected. Others had come, knowingly or unintentionally, from the man's coworkers, including the beautiful brunette in front of him. Two things about her were clear: she had strong negative feelings about the

deceased, and she was hiding something. His challenge was going to be to separate his investigative instincts from the compelling attraction he felt for this woman. Nina felt like she was on a roller coaster. In the dark. Going backwards. Since the day began, she had been unexpectedly jerked up, down, and sideways. The big "drop from the ride's peak" being the revelation that her lecherous creep of a boss had been murdered! Now, the detective whose presence had so electrified her as the police screened arriving employees was questioning her with more than a casual interest. His inquiries about her boss were easy -- she had detested the man, but she certainly hadn't killed him! But accounting for her time outside the office could expose activities that she wasn't ready to reveal. Now -- how to remove herself from suspicion when Detective Transom's mere touch made her stomach flutter and her heartbeat race? Enjoy *Intimate Caresses* - book two in The Love and Danger Series!

The thirteenth book in the beloved, bestselling Redwall saga - soon to be a major Netflix movie! Salamandastron, under the guardianship of old Lord Stonepaw, is under threat from an enemy of immense and terrifying power. Ungatt Trunn, the wildcat who can make the stars fall from the sky, has attacked with his Blue Hordes and is determined that the fortress should be his. The mountain's defences are weak and it seems that nothing can stand in his way. Nothing, that is, but the badger Lord Brocktree, who is drawn to Salamandastron by an undeniable sense of duty. But if he is to rescue the mountain from Trunn and his verminous hordes, he must gather about him an army capable of defeating them in battle. Together with the irrepressible haremaid, Dotti, and a host of brave creatures, Brocktree journeys to Salamandastron to fulfil his destiny.

No Such Thing as Dragons FT Press

A sensible solution to getting our economy back on track Pessimism is ubiquitous throughout the Western World as the pressing issues of massive debt, high unemployment, and anemic economic growth divide the populace into warring political camps. Right-and Left-wing ideologues talk past each other, with neither side admitting the other has any good ideas. In *American Gridlock*, leading economist and political theorist H. Woody Brock bridges the Left/Right divide, illuminating a clear

path out of our economic quagmire. Arguing from first principles and with rigorous logic, Brock demonstrates that the choice before us is not between free market capitalism and a government-driven economy. Rather, the solution to our problems will require enactment of constructive policies that allow "true" capitalism to flourish even as they incorporate social policies that help those who truly need it. Brock demonstrates how deductive logic (as opposed to ideologically driven data analysis) can transform the way we think about these problems and lead us to new and different solutions that cross the ideological divide. Drawing on new theories such as game theory and the economics of uncertainty that are based upon deductive logic, Brock reveals fresh ideas for tackling issues central to the 2012 U.S. Presidential election and to the nation's long-run future: Demonstrating that the concept of a government "deficit" is highly problematic since it blinds us to the distinction between a good deficit and a bad deficit - where a deficit is good if it results from borrowing dedicated to productive investment rather than to unproductive spending. Deriving the need for a U.S. Marshall Plan dedicated to very high levels of profitable infrastructure spending as the solution to today's Lost Decade of high unemployment Drawing upon a logical extension of the Law of Supply and Demand to demonstrate how the health-care spending crisis can be completely resolved by letting supply increase at a faster rate than demand Utilizing the theory of bargaining inaugurated by the "Beautiful Mind" mathematician John F. Nash, Jr., to help us avoid being repeatedly duped in our negotiations with China Making use of a completely new theory of market risk recently developed at Stanford University to demonstrate why dramatically limiting leverage is the key reform to preventing future Perfect Storms, whereas hoping to banish "greed" amounts to whistling Dixie Deducting from

first principles a solution to the contentious issue of fair shares of the economic pie, a solution that integrates the two fundamental norms of "to each according to his contribution" and "to each according to his need." Profound, timely and important, American Gridlock cuts through the stale biases of the Right and Left, advances new ways of thinking, and provides creative solutions to the problems that threaten American society.

From Kevin Brockmeier, one of this generation's most inventive young writers, comes a striking new novel about death, life, and the mysterious place in between. The City is inhabited by those who have departed Earth but are still remembered by the living. They will reside in this afterlife until they are completely forgotten. But the City is shrinking, and the residents clearing out. Some of the holdouts, like Luka Sims, who produces the City's only newspaper, are wondering what exactly is going on. Others, like Coleman Kinzler, believe it is the beginning of the end. Meanwhile, Laura Byrd is trapped in an Antarctic research station, her supplies are running low, her radio finds only static, and the power is failing. With little choice, Laura sets out across the ice to look for help, but time is running out. Kevin Brockmeier alternates these two storylines to create a lyrical and haunting story about love, loss and the power of memory.
