Vineland, a zone of blessed anarchy in northern California, is the last refuge of hippiedom, a culture devastated by the sobriety epidemic, Reaganomics, and the Tube. Here, in an Orwellian 1984, Zoyd Wheeler and his daughter Prairie search for Prairie's long-lost mother, a Sixties radical who ran off with a narc.

Vineland is vintage Pynchon, full of quasi-allegorical characters, elaborate unresolved subplots, corny songs ("Floozy with an Uzi"), movie spoofs (Pee-wee Herman in The Robert Musil Story), and illicit sex (including a macho variation on the infamous sportscar scene in V.). "Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible

while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances students' understanding of concepts through clear and effective illustrations, diagrams, and photographs."--Open Textbook Library

This textbook explains the ways in which experiments and simple calculations can lead to

an understanding of how cells work and which cellular and molecular biological processes are involved in their functioning. Each chapter reviews key terms, tests for understanding basic concepts, and poses research-based problems for the introduction of the experimental foundations of cell and molecular

biology.

Pioneers In Microbiology: The Human Side Of Science

PublicAffairs
A major literary moment: after being lost to history for more than a century, *The Road to Dawn* uncovers the incredible story of the real-life slave who inspired *Uncle Tom's Cabin*. -He rescued 118 enslaved people -He won a medal at the

first World's Fair in London -Queen Victoria invited him to Windsor Castle -Rutherford B. Hayes entertained him at the White House -He helped start a freeman settlement, called *Dawn*, that was known as one of the final stops on the Underground Railroad -He was immortalized in *Harriet Beecher Stowe's Uncle Tom's Cabin*, the novel that Abraham Lincoln jokingly blamed for sparking the Civil War But before all this, Josiah Henson was brutally enslaved for more than forty years. Author-filmmaker Jared A. Brock retraces Henson's 3,000+ mile journey from slavery to freedom and re-introduces the world to a forgotten figure of the Civil War era, along with his accompanying documentary narrated by Hollywood actor Danny Glover. *The Road to Dawn* is a ground-breaking biography lauded by NAACP, the Smithsonian, senators, authors, professors, the President of

Mauritius, and the 21st Prime Minister of Canada, and will no doubt restore a hero of the abolitionist movement to his rightful place in history.

Chisholm was one of the most influential Canadians of the twentieth century. A world-renowned psychiatrist, he was the first direct

or-general of the World Health Organization and built it up against overwhelming political odds in the years immediately following the Second World War. An atheist and a fierce critic of jingoistic nationalism, he supported world peace and world government and became a champion of the United Nations and the WHO.

Post-1945 international politics, global health issues, and medical history intersect in this highly readable account of a remarkable Canadian. **Brock Biology of Microorganisms** Springer Nature First published in 1982. This collaborative product of leading contributors seeks to update information on the psychology

of attitudes, attitude change, and persuasion. Social psychologists have invested almost exclusively in the strategies of theory-testing in the laboratory in contrast with qualitative or clinical observation, and the present book both exemplifies and reaps the products of this mainstream tradition of experimental social psychology. It represents experimental social psychology at its best. It does not try to

establish contact with the content-oriented strategies of survey research, which have developed in regrettable independence of the laboratory study of persuasion processes.
