**Close to the Bone (Special Edition) (Logan McRae, Book 8)** Harper Collins

When an Edinburgh serial killer is murdered in prison, his deadly legacy lives on to claim more victims in this “engrossing” Scottish detective mystery (Publishers Weekly). For ten years, a gruesome Christmastime tradition terrorized Edinburgh. Each year as the holiday approached, a young woman’s body was found—naked, throat slit, body washed clean. The final victim, Kirsty Summers, was Detective Constable Tony McLean’s fiancée. But the Christmas Killer made a mistake, and McLean finally put an end to the horror. Now, twelve years later, a fellow prisoner has just murdered the incarcerated Christmas Killer. But with the arrival of the festive season comes a body. A young woman: naked, washed, her throat cut. Is this a copycat killer? Was the wrong man behind bars all this time? Or is there a more frightening explanation? McLean must revisit the most disturbing case of his life and discover what he

missed before the killer strikes again. “Oswald’s detective gives John Rebus a run for his money in this noirish page-turner.”—Kirkus

[The Story of the Deadliest Pandemic in History](#) HarperCollins

Two Ash Henderson crime thrillers from

the author of four consecutive No. 1 Sunday Times bestsellers.

*Stuart MacBride: Ash Henderson 2-book Crime Thriller Collection* HarperCollins UK #1 New York Times bestseller “Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history.”—Bill Gates “Monumental... an authoritative and disturbing morality tale.”—Chicago Tribune The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, *The Great Influenza* provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, “The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face

on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart." At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.

---

SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of

the branch.
