In the first volume of the *To Shine with Honor* trilogy, Galien de Coudre, scholarly third son in a family of minor nobility, comes of age in the perilous world of late 11th century France, where powerful noblemen massacre the other and innocents in unending petty warfare over lands and silver, despite the efforts of the Church to control their violence. Galien, educated for the priesthood, trained at arms and horse by his father and older brothers, all knights, finds his once-certain future as a high Church official compromised by family misfortunes. Through a series of oft-wrenching

<p>events, he discovers his own destiny as events in France and the distant Holy Land draw inexorably toward the great war of faiths known in history as the First Crusade.</p> <p>A Crime Thriller Penguin</p> <p>Tori Brown is recovering from the embittered breakup of her engagement and seeks solace in the depths of Herefordshire. Living alone, she adapts to the close and friendly village life, where her personal life is not questioned, thus distancing herself from any prospective relationships. With the calming influence that her horse Carlos gives her, she is soon riding the bridle paths and woodland and beginning to enjoy her life once again. Sudden events take a hold and Tori is thrown, not only from Carlos, but into the beginnings of a new life that is to change everything. Someone else comes into her life, not what she quite expected but certainly what she wanted. Johan Andersen, a local Norwegian forester,</p>	<p>captures Tori's heart and from that point on life is not the same again... just better, beyond her wildest dreams.</p> <p>Broken Trust Not until the evidence was uncovered by tomb robbers in the 1870s would we have ever known. Then with the discovery of Tutankhamen ' s tomb in the 1920s, even more hints beckoned readily at hand. But as with so many things in life, critical clues often go unnoticed until science, accident, and intrigue collide. That collision was initiated by a Polish archaeologist who received permission to collect DNA samples from a group of royal mummies at the Cairo National Museum in 1973. A tragic victim of the Yom Kippur War, his samples sat dormant gathering dust until they were found and processed in 1998. Meanwhile during the early 1970s an international team noticed, while x-raying the same mummy collection, some</p>	<p>extremely unexpected physiological details among several of them. As with the radiological data, the chromosomal evidence proved to be equally disquieting. When taken together, they argued for the introduction of a unique genetic anomaly into the human genome during the Egyptian late Eighteenth Dynasty. The source was extraterrestrial. Bow Tie chronicles how an international scientific effort resolved the situation by using a most unusual means for prosecuting a most unscrupulous task – time travel and murder.
