However, there are ways that this cycle of repetitive flooding can be broken. Throughout the country, numerous examples can be found that illustrate practical and cost-effective methods for reducing or eliminating the risk of a house being flooded again. "Months before publication, William R. Forstchen's One Second

After was cited on the floor of Congress as a book all

Americans should read. Hundreds of thousands of people have

read the tale. One Year After is the thrilling follow-up to that

smash hit. The story picks up a year after One Second After

ends, two years since the detonation of nuclear weapons above

the United States brought America to its knees. After suffering

starvation, war, and countless deaths, the survivors of Black

Mountain, North Carolina, are beginning to piece back together

the technologies they had once taken for granted: electricity,

radio communications, and medications. They cling to the hope

that a new national government is finally emerging. Then

comes word that most of the young men and women of the

community are to be drafted into an "Army of National

Recovery" and sent to trouble spots hundreds of miles away.

When town administrator John Matherson protests the draft,

he's offered a deal: leave Black Mountain and enter national

service, and the draft will be reduced. But the brutal

suppression of a neighboring community under its new federal

administrator and the troops accompanying him suggests that

all is not as it should be with this burgeoning government"--
