Divided into three sections,
this book explores the
three main pillars of
sustainable development,
namely economy,
environment and society,
and their interlinkages at
the regional level. The first
section, Access and Benefit
Sharing (ABS) for
sustainable development,
focuses on international
agreements and national
legislation, as well as the
challenges in implementing
ABS in e.g. India. In turn,
the second section
examines the process of
forming Biodiversity
Management Committees
(BMCs) at the Local Self
Government (LSG) level to
promote environmental
sustainability, highlighting
local and community-level
conservation initiatives that
have led to the
conservation of habitats
and species. The third
section addresses poverty
eradication and food
security. The case studies
included demonstrate how

the combination of
traditional knowledge and
modern techniques can
enhance the productivity of
traditional crop varieties,
yielding greater benefits for
communities. The aim of
this volume is to
disseminate the lessons
learned from these case
studies, as well as the
findings from projects
already in place, which can
offer recommendations that
can be applied to similar
problems elsewhere in an
attempt to find
environmental solutions for
sustainable development.
Further, it introduces
readers to new approaches
to inclusive development,
demonstrating that
participation and grass root
empowerment are key
drivers of equitable and
sustainable development.

Jihad vs. McWorld is a
groundbreaking work, an
elegant and illuminating
analysis of the central
conflict of our times:
consumerist capitalism
versus religious and
tribal fundamentalism.
These diametrically
opposed but strangely
intertwined forces are
tearing apart--and
bringing together--the
world as we know it,
undermining democracy
and the nation-state on
which it depends. On the
one hand, consumer
capitalism on the global
level is rapidly dissolving
the social and economic
barriers between nations,
transforming the world's
diverse populations into a
blandly uniform market.
On the other hand, ethnic,
religious, and racial
hatreds are fragmenting
the political landscape
into smaller and smaller

tribal units. Jihad vs. McWorld is the term that distinguished writer and political scientist Benjamin R. Barber has coined to describe the powerful and paradoxical interdependence of these forces. In this important new book, he explores the alarming repercussions of this potent dialectic for democracy. A work of persuasive originality and penetrating insight, Jihad vs. McWorld holds up a sharp, clear lens to the dangerous chaos of the post-Cold War world. Critics and political leaders have already heralded Benjamin R. Barber's work for its bold vision and moral courage. Jihad vs. McWorld is an essential text for anyone who wants to understand our troubled present and the crisis threatening our future.

Peachpit Press

In this wide-ranging inside view of the history and practice of conducting, analysis and advice comes directly from working conductors, including Sir Charles Mackerras on opera, Bramwell Tovey on being an Artistic Director, Martyn Brabbins on

modern music, Leon Botstein on programming and Vance George on choral conducting, and from those who work closely with conductors: a leading violinist describes working as a soloist with Stokowski, Ormandy and Barbirolli, while Solti and Abbado's studio producer explains orchestral recording, and one of the world's most powerful managers tells all. The book includes advice on how to conduct different types of groups (choral, opera, symphony, early music) and provides a substantial history of conducting as a study of national traditions. It is an unusually honest book about a secretive industry and managers, artistic directors, soloists, players and conductors openly discuss their different perspectives for the first time.

The Cambridge Companion to Conducting Apress

When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a

large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent.

Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

You've heard about "flipping your classroom"—now find out how to do it! Introducing a

new way to think about higher education, learning, and technology that prioritizes the benefits of the human dimension.

Jos é Bowen recognizes that technology is profoundly changing education and that if students are going to continue to pay enormous sums for campus classes, colleges will need to provide more than what can be found online and maximize "naked" face-to-face contact with faculty. Here, he illustrates how technology is most powerfully used outside the classroom, and, when used effectively, how it can ensure that students arrive to class more prepared for meaningful interaction with faculty. Bowen offers practical advice for faculty and administrators on how to engage students with new technology while restructuring classes into more active learning environments.

In this mesmerizing book of photography, acclaimed photographer David Liittschwager reveals the unnerving beauty of three notoriously mysterious sea creatures--the jellyfish, octopus, and seahorse--and how they perceive the world. The jellyfish, the octopus, and the seahorse are among the most wondrous species on Earth--as well as some of the most difficult to document using traditional photography methods. Enter celebrated photographer David Liittschwager, who has spent decades developing specialized portraiture techniques to capture these creatures' pulsating bioluminescence, translucent bodies, and ethereal movements. This luminous collection showcases 200 of Liittschwager's most revealing photographs, paired with penetrating essays that explain how a creature without a brain

or without bones perceives the world. Bestselling science writers Elizabeth Kolbert, Jennifer Holland, and Olivia Judson explain the biology and advanced cognitive abilities of these spineless denizens of the deep, exquisitely evoking their unnerving yet undeniable charisma. In these pages, you'll glimpse a seahorse only half an inch tall, a moon jelly spinning off a snowflake-shaped clone, and the blinking comb jelly, which may be the most ancient living animal on Earth. Both enlightening and profound, this enchanting book documents the expanding frontiers of marine science, creating a powerful testament to the value and beauty of these little-seen--and endangered--species.
