The Highlander's Surrender Syngress

A Moscow detective is sent to Chernobyl for a frightening case in the most spectacular entry yet in Martin Cruz Smith ' s Arkady Renko series. In his groundbreaking Gorky Park, Martin Cruz Smith created an iconic detective of contemporary fiction. Quietly subversive, brilliantly analytical, and haunted by melancholy, Arkady Renko survived, barely, the journey from the Soviet Union to the New Russia, only to find his transformed nation just as obsessed with corruption and brutality as was the old Communist dictatorship. In *Wolves Eat Dogs*, Renko returns for his most enigmatic and baffling case yet: the death of one of Russia ' s new billionaires, which leads him to Chernobyl and the Zone of Exclusion—closed to the world since 1986 ' s nuclear disaster. It is still aglow with radioactivity, now inhabited only by the militia, shady scavengers, a few reckless scientists, and some elderly peasants who refuse to relocate. Renko ' s journey to this ghostly netherworld, the crimes he uncovers there, and the secrets they reveal about the New Russia make for an unforgettable adventure.

Travis King is the worst kind of asshole. He taunts me for being a good girl and mocks my high standards. He's cruel, crass, and has enough confidence to last two lifetimes. And I hate him. It wouldn't matter so much if he were avoidable. But considering he's my older brother's best friend and roommate, I see him more than I'd ever want to. His sculpted abs and gorgeous eyes are wasted on such an arrogant man, which makes me hate him even more. Even though I've had a crush on him since I was ten, the feelings weren't mutual and he's always made that very clear. He's always loved getting under my skin and one night against my better judgment, I let him in my bed. I've succumbed to his manwhore ways, but that doesn't change a thing. Because the King is about to get played at his own game—and lose. Checkmate.

Eliza Knight's bestselling Scottish historical romance series, *The Stolen Bride Series*, is back with another amazing tale of adventure, passion and love! Ceana Montgomery had notions of marrying for love after her first disastrous marriage ended in widowhood. But now Robert the Bruce has ordered her to marry a stranger, securing a strong alliance and ending a decades-old feud. Already used as a pawn once in marriage, she is devastated that she will once more have to give up her happiness in order to please the edicts of men. And while the braw warrior standing before her might incite feelings inside her she thought long since buried, desire is a far cry from love. The rivalry between Brochan Lamont and his twin brother, John, began in the womb, and only grew worse from there. They were pitted against each other in childhood, and their father left them with a legacy that was a race to the finish—whoever has an heir first inherits the lands. The only problem is that Brochan has given his loyalty to the Scots, and his brother to the English. In order to keep the lands and ships under Scottish control, Robert the Bruce demands Brochan marry to break the iron-clad will. His new bride harbors a fiery temperament that lures Brochan into stoking her passions instead of her ire. Aligned to strengthen the Scottish claims on the realm, Brochan and Ceana must work together to overcome the obstacles that bind them. But perhaps seeing their duties through does not have to be as painful as they both predicted. Is it possible that love can be forged from a union born in alliance? Maybe Fate knew all along just who was meant for who...

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys ' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J.
