Hanging with My Peeps  
Rachel Kim

It's June in Random Point and 18-year-old Amanda Sands has been left in charge of Hugo's antiques shop and his spanking magazine. Pursued by gallery owner Raphael Price as well as married photographer Pascal Robbins, the charismatic Harvard coed cuts her blonde hair short, turns sophisticated Pamela Bartlett into her adoring submissive and continues to ravish the senses of her love-

---

struck boyfriend Colby Hodge. Pascal's wife, singer-actress Phoebe Casper, develops a mad crush on composer Anthony Newton that threatens to ruin her marriage and dislodge Susan Ross as the queen of Newton's heart. Meanwhile Pamela's husband, department store owner Ambrose Bartlett, lays siege to voluptuous, former dominatrix Polyxena Guzman, which completely distracts him from noticing the worshipful court being paid to his glamorous wife by the youthful Dru Baxter. Marguerite Alexander creates the Venus Club to bring all her local girlfriends in the scene closer together, but doesn't foresee that including Jane Eliot in the circle will ignite a dangerous flame of desire in the girl who was once so in love with

her husband, Michael Flagg. The romance of discipline wafts through Random Point like a balmy summer breeze as its animated denizens discover just how much pleasure, passion and corporal punishment eroticism can be fit into one small month. About the Author: A lifelong enthusiast, Eve Howard has been writing, editing and creating spanking erotica since the 1980's. There are 10 previous volumes in the Shadow Lane series as well as a pictorial publication called Shadow Lane's The Art of Spanking Volume One. Eve has also written, directed and produced over 170 spanking videos and has recently returned to the small screen as a performer in some her own productions. Designed to make people feel good,

---

rather than guilty about being into spanking, Eve's books suggest an irreverent alternative to the BDSM extremes portrayed in such novels as *The Story of O*. Eve was the editor of the beautifully designed *Stand Corrected* magazine, which raised the bar for spanking publications in the 1990's. And for over 20 years, Eve's company Shadow Lane has been one of the primary social organs of the real-life spanking scene, throwing annual gala events for fellow enthusiasts to come together and celebrate the spicy variation that has preoccupied them for so long. Eve lives with her husband Tony and their two cats in Las Vegas.

The authors trace the emergence of Atatürk and

Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country."

Microbes are the most abundant organisms in the biosphere and regulate many critical elemental and biogeochemical phenomena.

---

Because microbes are the key players in the carbon cycle and in related biological reactions, microbial ecology is a vital research area for understanding the contribution of the biosphere in global warming and the response of the natural environment to climate variations. The beneficial uses of microbes have enabled constructive and cost-effective responses that have not been possible through physical or chemical methods. This new volume reviews the multifaceted interactions among microbes, ecosystems, and their pivotal role in maintaining a more balanced environment, in order to help facilitate living organisms coexisting with the natural environment. With extensive references, tables, and illustrations, this

book provides valuable information on microbial utilization for environmental sustainability and provides fascinating insights into microbial diversity. Key features include: Looks at enhancing plant production through growth-promoting arbuscular mycorrhizae, endophytic bacteria, and microbiome networks Considers microbial degradation and environmental management of e-wastes and azo dyes Explores soil-plant microbe interactions in metal-contaminated soils Examines radiation-resistant thermophiles for engineered bioremediation Describes potential indigenous/effective microbes for wastewater treatment processes Presents research on earthworms and microbes for organic farming

deadly alliance between LA gangsters and terrifying witches . . . A ruthless new crime syndicate holds Los Angeles in a grip of terror. Anyone who opposes it suffers a horrible death . . . but not at human hands. Bizarre accidents, sudden illnesses, inexplicable and gruesome deaths: the mobsters will stop at nothing to eliminate their enemies. Every bloody step of the way, their companions are four mysterious women, witches who wield more power than the gangsters could ever dream of. With the help of his mysteriously gifted neighbor, Annie Conjure, Detective Dan Fisher must fight both the LAPD ' s skepticism and this chilling new power. And at the heart of the nightmare lies the final puzzle, the secret of . . . The 5th Witch.

Shadow Lane Volume Eleven Springer  
Research on the frontiers of urban studies was the subject of a conference on nineteenth-century cities held in November

---

1968 at Yale University. These papers from the conference attempt to define what is coming to be known as the "new urban history." The cities studied range from small communities - such as Springfield, Massachusetts, and Poughkeepsie, New York - to giants like Philadelphia, Chicago, and Boston. While the majority of the contributions deal with American cities, four essays examine cities in Canada, England, France, and Colombia. The studies focus on the dimensions of mobility and stability in the social structure of nineteenth-century cities. Within this general frame, the essays explore such areas as urban patterns of class stratification, changing rates of occupational and residential mobility, social origins of particular elite groups, the relations between political control and social class, differences in opportunities for various ethnic groups, and the relationships between family structure and city life. In all these fields, the authors relate sociological theory to the historical materials; a complex yet

readable, interdisciplinary portrait of the origins of modern city life is the result.

The 5th Witch CRC Press Neo-Hasidism applies the Hasidic masters' spiritual insights—of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service—to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo

---

Carlebach, and Zalman Schachter-Shalomi—plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi recreated Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview

with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.
