Crafty Little Things to Sew B.T. Batsford

Exploring the possibility of wigs by portraying 111 transformations of Cameron Lee Phan in 111 handmade wigs made by Tomihiro Kono. Hairstyles are closely related to our identity; They create both our inner and outer self. This can reflect our personality or, in some way, can hide our true selves. We can suddenly make ourselves look like a different person by wearing a wig. A wig is a kind of mask, designed on the one hand to make a definite impression upon others, and on the other to conceal the true nature of the individual. Changing how we look is an act of self-reflection, self-assertion, and self-defense. We live in the spirals of the world by defining ourselves and being defined by others. In Latin times a persona was a mask; today our digital masks have turned into persons that amplify our individual digital essence, letting our fake and intangible identities take over. Tomihiro Kono's wigs are a reaction to our digital society and a way to reclaim our physicality: with his creations the artist and designer invites us indeed to go over a physical, rather than digital, transformation. A wig by Tomihiro Kono is therefore a "mask-thrix" - a mask for the hair ("thrix" meaning "hair" in Greek), a symbol of an existential drama and the possibility of taking up not just one role, but multiple ones. By wearing a wig by Tomihiro Kono you can be anything and anyone but yourself. The promise is alluring. Enter the Mask-Thrix.

One-yard Wonders National Geographic Books

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
