The Missing Cryptoqueen Random House  
175 countries, four billion dollars, one scam: the thrilling rise and fall of the biggest cryptocurrency con in history and the woman behind it all In 2016, on stage at Wembley Arena in front of thousands of adoring fans, Dr. Ruja Ignatova promised her followers a financial revolution. The future, she said, belonged to cryptocurrencies such as Bitcoin. And the Oxford-educated, self-styled cryptoqueen vowed that she had invented the Bitcoin Killer. OneCoin would not only earn its investors untold fortunes; it would change the world. By March 2017, more than \$4 billion had been invested in OneCoin in countries all around the world. But by October 2017, Ruja Ignatova had disappeared, and it slowly became clear that her revolutionary cryptocurrency was not all it seemed. Fortune was left asking, “ Is OneCoin the biggest financial fraud in history? ” In The Missing Cryptoqueen, acclaimed tech journalist Jamie Bartlett tells the story he began in his smash hit BBC podcast, entering the murky worlds of little-regulated cryptocurrencies and multilevel marketing schemes. Through a globe-crossing investigation into the criminal underworlds, corrupt governments, and the super-rich, he reveals a very modern tale of intrigue, techno-hype and herd madness that allowed OneCoin to become a million-person pyramid scheme—where, at the top, investors were making millions and, at the bottom, people were putting their livelihoods at risk. It ’ s the inside story of the smartest and biggest scam of the 21st Century—and the genius behind it, who is still on the run.

One last time, let yourself be swept away by the curious cases and Holmes' grandiose talent of deduction. This collection includes: "The Adventure of the Mazarin Stone", "The Problem of Thor Bridge", "The Adventure of the Creeping Man", "The Adventure of the Sussex Vampire", "The Adventure of the Three Garridebs", "The Adventure of the Illustrious Client", "The Adventure of the Three Gables", "The Adventure of the Blanched Soldier", "The Adventure of the Lion's Mane", "The Adventure of the Retired Colourman", "The Adventure of the Veiled Lodger", and "The Adventure of Shoscombe Old Place". Sir Arthur Conan Doyle (1859-1930) was born in Scotland and studied medicine at the University of Edinburgh. After his studies, he worked as a ship’s surgeon on various boats. During the Second Boer War, he was an army doctor in South Africa. When he came back to the United Kingdom, he opened his own practice and started writing crime books. He is best known for his thrilling stories about the adventures of Sherlock Holmes. He published four novels and more than 50 short-stories starring the detective and Dr Watson, and they play an important role in the history of crime fiction. Other than the Sherlock Holmes series, Doyle wrote around thirty more books, in genres such as science-fiction, fantasy, historical novels, but also poetry, plays, and non-fiction.

The Man Who Ran Washington MICHIE  
A huge bestseller in Germany for over a year, My Father’s Country offers extraordinarily moving and riveting insight into the experience of being German in the last century. On August 26, 1944, Hans Georg Klamroth, officer in the German army and member of the SS, was executed for high treason for his participation in the July 1944 plot to assassinate Hitler. My Father’s Country is the extraordinary work of Klamroth’s daughter, Wibke, born only six years before her father’s death. Decades later, Bruhns was watching a TV documentary about the events of July 1944 when images of her father in the court room suddenly appeared on screen. “I stare at this man with the empty face. I don’t know him. But I can see myself in him — his eyes are my eyes; I know I resemble him. I know I wouldn’t be here without him. And what do I know about him? Nothing at all.” Based on an extensive collection of family letters, private diaries, photographs and even menus, My Father’s Country traces Wibke Bruhns’ father’s, and more widely, her well-to-do merchant family’s, life in the Germany of the late nineteenth and early twentieth centuries. With it, Bruhns not only brings to life the nuances of this world — its culture and its assumptions, politics and beliefs — but also comes to know, finally, the mysterious father she barely remembers.

Hunger is a daily reality for a billion people. More than six decades after the technological discoveries that led to the Green Revolution aimed at ending world hunger, regular food shortages, malnutrition, and poverty still plague vast swaths of the world. And with increasing food prices, climate change, resource inequality, and an ever-increasing global population, the future holds further challenges. In One Billion Hungry, Sir Gordon Conway, one of the world’s foremost experts on global food needs, explains the many interrelated issues critical to our global food supply from the science of agricultural advances to the politics of food security. He expands the discussion begun in his influential The Doubly Green Revolution: Food for All in

the Twenty-First Century, emphasizing the essential combination of increased food production, environmental stability, and poverty reduction necessary to end endemic hunger on our planet. Conway addresses a series of urgent questions about global hunger: • How we will feed a growing global population in the face of a wide range of adverse factors, including climate change? • What contributions can the social and natural sciences make in finding solutions? • And how can we engage both government and the private sector to apply these solutions and achieve significant impact in the lives of the poor? Conway succeeds in sharing his informed optimism about our collective ability to address these fundamental challenges if we use technology paired with sustainable practices and strategic planning. Beginning with a definition of hunger and how it is calculated, and moving through issues topically both detailed and comprehensive, each chapter focuses on specific challenges and solutions, ranging in scope from the farmer's daily life to the global movement of food, money, and ideas. Drawing on the latest scientific research and the results of projects around the world, Conway addresses the concepts and realities of our global food needs: the legacy of the Green Revolution; the impact of market forces on food availability; the promise and perils of genetically modified foods; agricultural innovation in regard to crops, livestock, pest control, soil, and water; and the need to both adapt to and slow the rate of climate change. One Billion Hungry will be welcomed by all readers seeking a multifaceted understanding of our global food supply, food security, international agricultural development, and sustainability.

On August 14, 2011, when I was in Kandergrund in the Bernese Highlands in Switzerland an important connection became very clear to me. I recognized a spiritual cause for why we are losing part of our youth. I was very shocked. I thought of my children and grandchildren. Since then I have been intensively occupied with this subject.Now I believe that the same spiritual cause is behind many of our problems; specifically the personal problems, in the local churches and the world-wide church. It is the lack of the Holy Spirit. If this is the cause, then we should urgently address this issue. If the cause can be eliminated or considerably reduced, then many problems will become superfluous or will be resolved.

National Book Award Finalist A heartstrong story of family and romance, tribulation and tenacity, set on the High Plains east of Denver. In the small town of Holt, Colorado, a high school teacher is confronted with raising his two boys alone after their mother retreats first to the bedroom, then altogether. A teenage girl—her father long since disappeared, her mother unwilling to have her in the house—is pregnant, alone herself, with nowhere to go. And out in the country, two brothers, elderly bachelors, work the family homestead, the only world they've ever known. From these unsettled lives emerges a vision of life, and of the town and landscape that bind them together—their fates somehow overcoming the powerful circumstances of place and station, their confusion, curiosity, dignity and humor intact and resonant. As the milieu widens to embrace fully four generations, Kent Haruf displays an emotional and aesthetic authority to rival the past masters of a classic American tradition.

In a world where the slightest edge can mean the difference between success and failure, Leisha Camden is beautiful, extraordinarily intelligent ... and one of an ever-growing number of human beings who have been genetically modified to never require sleep. Once considered interesting anomalies, now Leisha and the other "Sleepless" are outcasts -- victims of blind hatred, political repression, and shocking mob violence meant to drive them from human society ... and, ultimately, from Earth itself. But Leisha Camden has chosen to remain behind in a world that envies and fears her "gift" -- a world marked for destruction in a devastating conspiracy of freedom ... and revenge.

The sibling stands out as a ubiquitous—yet unacknowledged—conceptual touchstone across the European long nineteenth century. Beginning in the late eighteenth century, Europeans embarked on a new way of classifying the world, devising genealogies that determined degrees of relatedness by tracing heritage through common ancestry. This methodology organized historical systems into family trees in a wide array of new disciplines, transforming into siblings the closest contemporaneous terms on trees of languages, religions, races, nations, species, or individuals. In literature, a sudden proliferation of siblings—often incestuously inclined—negotiated this confluence of knowledge and identity. In all genealogical systems the sibling term, not quite same and not quite other, serves as an active fault line, necessary for and yet continuously destabilizing definition and classification. In her provocative book, Stefani Engelstein argues that this pervasive relational paradigm shaped the modern subject, life sciences, human sciences, and collective identities such as race, religion, and gender. The insecurity inherent to the sibling structure renders the systems it underwrites fluid. It therefore offers dynamic potential, but also provokes counterreactions such as isolationist theories of subjectivity, the political exclusion of sisters from fraternal equality, the tyranny of intertwined economic and kinship theories, conflicts over natural kinds and evolutionary speciation, and invidious anthropological and philological classifications of Islam and Judaism. Integrating close readings across the disciplines with panoramic intellectual history and arresting literary interpretations, Sibling Action presents a compelling new understanding of systems of knowledge and provides the foundation for less confrontational formulations of belonging, identity, and agency.

'Blown to Bits' is about how the digital explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives.
