Brunei Country Study Guide - Strategic Information and Developments

Brunei Charting an Asian Trajectory for Literacy Education

This detailed survey of Brunei English reflects the burgeoning academic interest in the many new varieties of English which are fast evolving around the world. Wholly up to date, the study is based on careful analysis of a substantial dataset that provides real-life examples of usage to illustrate the narrative throughout. As well as a thorough account of the pronunciation, grammar, vocabulary usage, and discourse patterns of Brunei English, the volume explores its historical and educational

background and current developmental trends, providing an in-depth review of the patterns of English usage within this multilingual, oil-rich society on the north-western coast of Borneo. Written in a non-technical style throughout that will assist non-specialists wishing to grasp the fundamentals of this unique brand of the English language, the work is a worthy addition to Springer's series on multilingual education that plugs a gap in the coverage of the numerous varieties of English being used across South East Asia. "The authors bring renewed and badly needed attention to the long-overlooked development of Brunei English. Their examination of the variety not only documents the features and functions of English within Brunei society, it also suggests the development of regional or global varieties of English that extend beyond Brunei, and even beyond South East Asia." Andrew Moody, University of Macau

The Report: Brunei Darussalam 2010 Cambridge University Press

Contrary to modern theories of developing nations, Brunei Darussalam, which has a very high rate of literacy, is also one of the

---

few countries where the traditional elite retains absolute political power. Professor Gunn's comprehensive study, which assesses the state's efforts to implement national language policies, explores the aspects of the complex relationship between language and power including the oral tradition, the rise of Islamic literacy, print culture and mass literacy, and the electronic media and its effects.

Charting an Asian Trajectory for Literacy Education Commonwealth Secretariat

This book explores issues shaping and defining modern Bruneian identity. It addresses the research gap regarding Brunei studies in terms of the language, literature, and culture of Brunei which, with its bilingual education, is uniquely positioned at the intersection of the Malay and western worlds. The book analyses the linguistic, literary, and cultural modes that provide the backdrop for modern-day instantiations of local identity, as expressed through printed and online materials, film, art, and social practices. It compares Brunei English and Brunei Malay in the context of the literature and culture of Brunei. Readers will find it useful as an essential resource for academic scholars, university students, and others interested in the study of Brunei Darussalam's language, literature, and culture. It provides critical insights from an insiders' perspective into the local identity of the culturally diverse Bruneian society.

Language, Power, and Ideology in Brunei Darussalam World Scientific

The outbreak of the pandemic around the world came with national measures to deal with the health emergency that caused and will continue to cause important disruption in education for students, teachers, and policymakers. Digital technologies can provide innovative solutions that can prevent the negative effects of lockdowns of countries and regions on education. It is important to analyze digital solutions and experiences for distance learning and to better understand the available resources and best practices to deal effectively with the challenges of digital learning for both learners and academic staff. It is important that countries promote digital excellence and explore the opportunities that information technologies can provide to education institutions, especially in the post-pandemic scenario, and the major transformations it will bring to citizens, societies, and economies. The Handbook of Research on Analyzing IT Opportunities for Inclusive Digital Learning explores the new demands of labor markets in the digital economy, how educational institutions can respond to these new opportunities and threats, the development of new teaching and learning methods, and finally, the development of digital skills and competences. It also discusses the

---

challenges and opportunities caused by the pandemic in the area of education and how information technologies can transform education and develop a new workforce with the required digital skills and competences and knowledge to fit the post-pandemic labor market. This book highlights topics including knowledge management systems, learning technologies, personalized learning, and more within the context of diverse student populations. It is a valuable reference tool for academics, researchers, lecturers, decision makers, policymakers, and practitioners interested in new theories, research findings, and case studies for understanding inclusive digital learning and the opportunities for digital technologies in education.

classroom text and for self-study.

Ministries of Education in Small States Lulu.com

This volume--the first to bring together research on sociocultural aspects of mathematics education--presents contemporary and international perspectives on social justice and equity issues that impact mathematics education. In particular, it highlights the importance of three interacting and powerful factors--gender, social, and cultural dimensions. Sociocultural Research on Mathematics Education: An International Perspective is distinguished in several ways: \* It is research based. Chapters report on significant research projects; present a comprehensive and critical summary of the research findings; and offer a critical discussion of research methods and theoretical perspectives undertaken in the area. \* It is future oriented, presenting recommendations for practice and policy and identifying areas for further research. \* It deals with all aspects of formal and informal mathematics education and applications and all levels of formal schooling. As the context of mathematics education rapidly changes--with an increased demand for mathematically literate citizenship; an increased awareness of issues of equity, inclusivity, and accountability; and increased efforts for globalization of curriculum development and research-- questions are being raised more than ever before about the problems of teaching and learning mathematics from a non-cognitive science perspective. This book contributes significantly to addressing such issues and answering such questions. It is especially relevant for researchers, graduate students, and policymakers in the field of mathematics education.

Brunei Ecology and Nature Protection Handbook Lulu.com

Weaving outwards from a centripetal force of biographical stances, this book presents the collective perspectives of literacy researchers from Brunei, China, Hong Kong, Malaysia, Singapore, the Philippines and

Taiwan. It represents the first all-Asian initiative to showcase the region ' s post-colonial, multilingual and multicultural narratives of literacy education. This book provides a much-needed platform that initiates important conversations about literacy as a sociocultural practice in a region that is both challenged and shaped by sociocultural influence unique to Asia ' s historical and geopolitical trajectory. Driven by the authors ' lived experiences of becoming literate as well as their empirical research work in later years, each chapter brings decades of biographical narratives and collective empirical research findings to bear. Within the book are negotiations about literacy across and within home and school contexts; transactions of literature, text and reader; and considerations of the literacy policy-practice nexus. These trajectories, while divergent in their issues, come together as shared lived experience located in local contexts considered through global perspectives. As Asia looks set to become the 21st century ' s new economic and labour force, the need to understand the sociocultural milieu of this region cannot be understated. This book on literacy education in Asia contributes to the larger narrative.

extensive collection of facts, statistics, analysis and directory information in one accessible volume.

Borneo Bulletin Brunei Yearbook Routledge

This volume draws together the viewpoints and research findings of leading scholars and informed local practitioner-researchers throughout Asia-Pacific about the issues and challenges of English as a medium of instruction (EMI) at higher education institutions in that region. Specifically, it addresses four key themes: Macro-level EMI policy and practice; institutional implications for pedagogy; stakeholder perceptions of EMI; and challenges of interpersonal interaction in EMI contexts. The book is among the first to critically examine the emerging global phenomenon of English as a medium of instruction, and the first title to exclusively explore Asia-Pacific tertiary contexts. It will be of particular interest to policy-makers in international education and tertiary educators seeking blueprints for practice, as well as scholars and postgraduate students of English as a lingua franca, English for academic purposes, academic language and learning, and language education in Asia-Pacific.

Studies in Educational Learning Environments Oxford Business Group  
After being a British protectorate for about 96 years since the 1888 Treaty of Protection, the modern state of Negara Brunei Darussalam (Abode of Peace) eventually obtained its independence from Great Britain on 1 January 1984. Run by a royal family that established a kingdom in Brunei some 650 years ago, the first sultan, Muhammad Shah (Alak Betatar) was installed in c.1363. Sultan Hassanal Bolkiah, the current ruler, is the 29th sultan of the lineage and is one of the richest men in the world. In spite of being called a mini-state, Brunei is well-known around the world because its population enjoys one of the highest gross national income per capita in the world, at an average of US\$39,943 (2015) a year. This third edition of Historical Dictionary of Brunei Darussalam contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Brunei Darussalam.
