This book is the first English translation of the German architect Bruno Taut's early twentieth-

century anthology *Die Stadtkrone* (The City Crown). Written under the influence of World War I, Taut developed *The City Crown* to promote a utopian urban concept where people would live in a garden city of 'apolitical socialism' and peaceful collaboration around a single purpose-free crystalline structure. Taut's proposal sought to advance the garden city idea of Ebenezer Howard and rural aesthetic of Camillo Sitte's urban planning schemes by merging them with his own 'city crown' concept. The book also contains contributions by the Expressionist poet Paul Scheerbart, the writer and politician Erich Baron and the architectural critic Adolf Behne. Although the original German text was

republished in 2002, only the title essay of *The City Crown* has previously been translated into English. This English translation of Taut's full anthology, complete with all illustrations and supplementary texts, fills a significant gap in the literature on early modern architecture in Germany and the history of urban design. It includes a translators' preface, introduction and afterword to accompany the original composition of essays, poems, designs and images. These original texts are accompanied by illustrations of Taut's own designs for a utopian garden city of 300,000 inhabitants and over 40 additional historic and contemporary examples. The new preface to *The City Crown* explains the premise for the English translation of Taut's anthology, its organization and the approaches taken by the translators to maintain the four different voices included in the original work. Matthew Mindrup's introduction critically examines the professional and intellectual developments leading up to and supporting Bruno Taut's

proposal to advance the English garden city concept with a centralized communal structure of glass, the city crown. Through the careful examination of original *Older Americans Information Directory* Lippincott Raven New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

He typically starts out from a realistic situation, then introduces a twist in the psyche of the main character that launches the rest of the action - for example, in *The Magnanimous Cuckold* a suspected glimmer of lust in Petrus's eye suffices to incite Bruno and to subjugate the other figures in the play to his expression of folly - and the realistic is

soon overtaken by the obsessional and finally the absurd.

Over the course of his career, legendary director Werner Herzog (b. 1942) has made almost sixty films and given more than eight hundred interviews. This collection features the best of these, focusing on all the major films, from *Signs of Life* and *Aguirre, the Wrath of God* to *Grizzly Man* and *Cave of Forgotten Dreams*. When did Herzog decide to become a filmmaker? Who are his key influences? Where does he find his peculiar themes and characters? What role does music play in his films? How does he see himself in relation to the German past and in relation to film history? And how did he ever survive the wrath of Klaus Kinski? Herzog answers these and many other questions in twenty-five interviews ranging from the 1960s to the present. Critics and fans recognized Herzog's importance as a young German filmmaker early on, but his films have attained international significance over the decades. Most of the interviews collected in this volume—some of them from Herzog's production

archive and previously unpublished—appear in English for the very first time. Together, they offer an unprecedented look at Herzog's work, his career, and his public persona as it has developed and changed over time.

This book brings together findings from research and clinical practice, with comprehensive coverage of the important aspects of mental health in ageing persons with intellectual and developmental disabilities. It is crucial for professionals involved in the care of persons with all intellectual and developmental disabilities to have a broad understanding of the essential range of issues, and therefore this book provides a truly multidisciplinary perspective, complete with many figures and illustrations to underline the key points. Undoubtedly, research and clinical practice are much more advanced in the general ageing population than in persons with intellectual and developmental disabilities, and so professionals and academics must be made fully aware of commonalities and idiosyncrasies of older people with intellectual and developmental disabilities. This book presents the ongoing developments concerning

mental health and aging, which will become relevant to the intellectually disabled population. Through experience, this book also acknowledges that the impact on the persons themselves and on their carers always needs to be taken into account, with treatment programs established with a multi-faceted team approach in mind. Avoiding the jargon of many titles in this area while maintaining the hands-on approach of clinical practice, this book meshes the practical and scientific worlds, with all chapters written by leading experts in the field. Beyond the US, the IASSIDD support expands the book message worldwide.

As the nation reels from the impact of the Great Recession, many families are finding new ways to live together, including creating multigenerational households to save money and consolidate resources. Indeed, as the authors point out, the concept of nuclear family living is an aberration in our history that stemmed from post – World War II prosperity, mobility, and the associated baby boom. However, the threatened failure of American social security and healthcare systems is forcing us all to rethink how we live and care for one another. This book covers the financial and emotional benefits of living together, proximity and privacy, designing and remodeling your home to accommodate adult children or elderly parents, overcoming cultural stigmas about interdependent living, financial and legal planning, and making cohabitation agreements.
