Both the engine and frame numbers, together with prefix and suffix letters, must be quoted in full on any correspondence relating to the machine or on any enquiry regarding this manual. The engine number is stamped on top of the crankcase

immediately below the cylinder. The frame number is stamped on the front engine mounting plate. Page 6

Free BSA Motorcycle Service Manuals for download.

Lots of people charge for motorcycle service and workshop manuals online which is a bit cheeky I reckon as they are freely available all over the internet. £5 each online or

download your BSA manual here for free!!

Bsa Bantam Engine Manual - morganduke.org

The engine proved itself, and with small motorcycles becoming ever more popular in Britain, BSA decided to build a complete motorcycle around the D1 engine. In October 1948 the BSA Bantam was released, the bike had telescopic forks, a rigid rear end, direct electrics, shovel front-mudguard and fishtail silencer.

BSA Bantam D1 D3 D7 engine cover, clutch side. Ok,i have just this week, taken this out of a d3 bantam,as i am going to put the original d3 engine back in. bsa bantam d7 engine flywheel stuffer plates. This BSA Bantam D1 D3 D7 engine is used

and shabby. Sold as seen. Collection from Redruth only.

BSA Bantam - Wikipedia
THE BSA BANTAM LIBRARY.
Welcome to the site. Over the past few years I have cobbled together a collection of literature pertaining to the BSA Bantam motorcycle. I intend to use this site to make this information freely available for enthusiasts to use, rather than being ripped off by some bandit

selling a bad photocopy for an extortionate fee.

The BSA Bantam
is a two-stroke
unit construction
motorcycle that
was produced by
the Birmingham
Small Arms
Company (BSA)
from 1948 (as a
125 cc) until 1971
(as a 175 cc).
Exact production

figures are
unknown, but it
was over 250,000
[citation needed]
and some
estimates place
the number closer
to half a million.

BSA AI's tips were very good and are all you need if you do not want to spend, spend, spend. One further tip is that you cannot put material back on if you take too much off. BSA's only concession to performance improvement before the D10 and later range was the introduction of optional close ratio gears. I think George Todd also made them as well.
