BSA used a system of letters and numbers for yearly identification of their machines. This information combined with the yearly numbers below should help you identify the year and model of your machine.

English BSA lawn mower engine

This lovely vintage BSA Sloper set the trend for canted cylinders in 1926 and started a global craze. BSA 's S-range was designed for 1927 by Daimler automobile designer Harold Briggs, who tilted the engine forward to give a lower center of gravity and a cooler cylinder head.

The BSA Sloper motorcycles, appeared in August, 1926 as model S, was the bright representative of the British big motorcycles of the pre-war period. The model has received the name because of the engine inclined forward. It was externally pleasant, reliable,

rather and silent quick machine.

The BSA S-Series of motorcycles, most  
commonly known as the BSA Sloper, were a  
series of motorcycles produced by the  
Birmingham Small Arms Company (BSA)  
from 1927-1935.. Launched in 1927, the  
493cc overhead valve engine was slanted, and  
the motorcycle featured a saddle tank that  
enabled a low seating position, improving the  
centre of gravity and handling.

Factory shot of 1928 Sloper with sporty  
turned-down handlebars. Lights were an  
extra. BSA 's Model S was launched into a  
world of traditional ' flat-tank '  
motorcycles in 1927 — and caused a  
sensation. With a shapely saddle tank,  
fashionable sloping engine and low seat  
height, its looks began a trend which would  
last well into the 1930s.

#### Bsa Sloper Engine

The BSA M33-10 was a British motorcycle made  
by BSA at their factory in Small Heath,  
Birmingham in 1933. Development. The M33-10  
was developed as a 5.95 hp side valve based on

the earlier BSA Sloper with capacity extended to  
595cc to make it more suitable for use with a  
sidecar.

From the top. The B series fly wheels will be too  
light for any 500 cc sloper. At best the primary  
side engine shaft from a B series probably could  
be used in the sloper as there only seems to be 2  
different diameters used on the engine shafts on  
singles.

Photo, review and description of BSA Sloper  
motorcycle!

Engine. The Sloper 's side-valve engine is a  
traditional British design of the period, with  
the crank supported in substantial roller and  
ball races, geared timing drive and oil carried  
in integral compartments in the front and rear  
of the crankcase.
