Psychology is both an applied and academic field that studies the human mental processes and behaviour. The present book comprehensively deals with the appropriate areas of Psychology to help the students of Nursing and other healthcare courses gain an insight of the subject. The text begins with the evolution and history of Psychology and its branches, and moves on to the methods adopted by the contemporary psychologists in mapping the human brain. It focuses on the applications of psychology in performance enhancement and self-help. Psychological aspects like perception, learning, emotion, aptitude and intelligence are further exemplified and elucidated in this book with the clinical problems associated with them. The book also deals with the common health problems associated with stress—the bane of modern existence—and provides solutions to cope with those problems. The modern day issues like lifestyle illness and attitudinal problems are also addressed in this book. In the second edition, a new chapter namely, 'Importance and Impact of Psychology for Nursing Profession' has been introduced, which facilitates the nurses to adapt to the changing demand of the profession seamlessly. Furthermore, in this edition, the narrative has been revised in general with added commentary and pictorial representations to make the text illustrative and engaging.

People can best help dyslexic students once they understand dyslexia's association with anxiety and effective coping strategies, both cognitively and emotionally. By highlighting the perspectives of dyslexic students, this book evidences the prevalence of anxiety in dyslexic communities. The shared experience from a range of dyslexic learners pinpoints best practice models and helps combat the isolation felt by many with learning difficulties. The author targets academic areas where students struggle, offering techniques to overcome these barriers. Such obstacles are not always due to cognitive factors but may be associated with negative experiences, leading to fear and uncertainty. Recounting these sticking points through student voices, rather than from a staff viewpoint, enables readers to find meaningful solutions to dyslexia-related problems. Through this dynamic methodology, the book shows researchers and practitioners how to understand dyslexic needs on an emotional level, while presenting dyslexic readers with practical coping methods.

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020.
