Core, Math G6 Penguin

Mike tries so hard to please

his father, but the only

language his dad seems to

speak is calculus. And for a

boy with a math learning

disability, nothing could be

more difficult. When his dad

sends him to live with distant

relatives in rural Pennsylvania

for the summer to work on an

engineering project, Mike figures this is his big chance to buckle down and prove himself. But when he gets there, nothing is what he thought it would be. The project has nothing at all to do with engineering, and he finds himself working alongside his wacky eighty-something-year-old aunt, a homeless man, and a punk rock girl as part of a town-wide project to adopt a boy from Romania. Mike may not learn anything about engineering, but what he does learn is far more valuable.
