Designed to offset the effect of sexually biased texts and

materials, this annotated bibliography lists available nonsexist instructional resource material for students in kindergarten through twelfth grades. The majority of items focus on activities teachers can use in classroom settings. The guide is organized into the following eight subject areas: general awareness, counseling and career guidance, fine arts, health and physical education, language arts, math and science, social studies, and sex equity organizations. Materials listed include lesson plans, course outlines, supplementary texts, periodicals, games, photographs, multimedia programs, audiovisual materials, and bibliographies. Six appendices respectively detail subject definitions, offer footnote sources, explain how to obtain the materials listed, describe a model for developing nonsexist lesson plans, give an example of a lesson planning activity sheet, and offer guidelines for developing nonbiased materials. The untimely death of Robert Smithson in 1973 at age 34 robbed postwar American art of an unusually creative practitioner and

thinker. Smithson's pioneering earthworks and installations of the 1960s and '70s anticipated concerns with environmentalism and site-specific artistic production. Gary Shapiro's insightful study of Smithson's career is the first book to address the full range of the artist's dazzling virtuosity.

"There have been other exhibitions of his works, but Robert Smithson: Photo Works is the first to examine his use of the camera and to present the way he saw the unique landscapes in which he traveled and located his art. As demonstrated by curator of photography Robert A. Sobieszek, the photographic image was central to Smithson's art, whether in collages, montages, sequences, films, or alone. Smithson's final projects attempted a collaboration art and industry. He believed artists could assist in reclaiming such devastated areas as open-face strip mines. Our expanding presence in and impact upon the land may have become so pervasive that the boundaries between nature and culture have been all but obliterated. Now

two decades after his death, Robert Smithson's lessons are all the more vital and significant."-from preface.

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of

---

money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.
