How to Eat Bantam

The first book in the Mindfulness Essentials Series by Zen Master Thich Nhat Hanh, *How to Sit* offers clear, simple directions and inspiration for anyone wanting to explore mindfulness meditation. In short, single-paragraph chapters, Nhat Hanh shares detailed instructions, guided breathing exercises and visualizations, as well as his own personal stories and insights. This pocket-sized book is perfect for those brand new to sitting meditation as well as for those looking to deepen their spiritual practice. With sumi ink drawings by Jason DeAntonis.

*Buddha Mind, Buddha Body* Red Wheel/Weiser

Thich Nhat Hanh explores the connection between psychology, neuroscience, and meditation. He discuss the importance of creativity and visualization in a successful meditation practice, presents basic Buddhist practices (in particular walking meditation and sitting meditation), and writes about the importance of brotherhood and sisterhood in finding love, happiness, and living harmoniously with others. *Buddha Mind, Buddha Body* continues and reviews the material in *Understanding Our Mind* by the same author (ISBN 1888375302). It opens with the question: Is free will possible? It becomes a leitmotif as Thich Nhat Hanh explores how the mind functions and how we can work with it to cultivate more freedom and understanding, be in closer touch with reality, and create the conditions for our own happiness. *Buddha Mind, Buddha Body* is punctuated with stories from the life of the Buddha as well as stories and observations from Thich Nhat Hanh's own life. Delivered in his inimitable light, clear, often-humorous style, *Buddha Mind, Buddha Body* will appeal to those new to the subject and at the same time challenge those who are already familiar with it.

*Ten Breaths to Happiness* Parallax Press

Using the garden as a metaphor, *The Seeds of Love* offers a process for creating mindfulness. From a Buddhist perspective, everything affects our consciousness and enters metaphorically as a seed. This occurs through the development of the practice of mindfulness, and using its tools to maintain a state of awareness and openness to self and others. Readers interested in Zen Buddhism will learn how to nurture such seeds as compassion, joy and generosity and to use personal challenges such as jealousy, anger and self doubt as a means of growth. Using precepts from many faiths and traditions, *The Seeds of Love* fosters the practice of using simple, basic actions to reach the best within ourselves and share it with those around us. It will be an invaluable guide to anyone seeking deeper and more conscious relationships.

*No Mud, No Lotus* Clever Fox Publishing

Meditation helps us to cut through the agonizing clutter of superficial mental turmoil and allows us to experience more spacious and joyful states of mind. It is this pure and luminous state that I call your Wildmind. From how to build your own stool to how a raisin can help you meditate, this illustrated guide explains everything you need to know to start or strengthen your meditation practice.

*The Objectification Spectrum* Shambhala Publications

In the aftermath of the terrorist attacks of September 11, this thought-provoking essay explores the Buddha's teaching to find one prescription: not war, not pacifism but nonviolence.

*WALK TOWARDS LORD BUDDHA* Tuttle Publishing

Thirty years ago, "mindfulness" was a Buddhist principle mostly obscure to the west. Today, it is a popular cure-all for Americans' daily problems. A massive and lucrative industry promotes mindfulness in every aspect of life, however mundane or unlikely: Americans of various faiths (or none at all) practice mindful eating, mindful sex, mindful parenting, mindfulness in the office, mindful sports, mindfulness-based stress relief and addiction recovery, and hire mindful divorce lawyers. Mindfulness is touted by members of Congress, CEOs, and Silicon Valley tech gurus, and is even being taught in public schools, hospitals, and the military. Focusing on such processes as the marketing, medicalization, and professionalization of meditation, Jeff Wilson reveals how Buddhism shed its countercultural image and was assimilated into mainstream American culture. The rise of mindfulness in America, Wilson argues, is a perfect example of how Buddhism enters new cultures and is domesticated: in each case, the new cultures take from Buddhism what they believe will relieve their specific distresses and concerns, and in the process create new forms of Buddhism adapted to their needs. Wilson also tackles the economics of the mindfulness movement, examining commercial programs, therapeutic services, and products such as books, films, CDs, and even smartphone applications. *Mindful America* is the first in-depth study of this phenomenon—invaluable for understanding how mindfulness came to be applied to such a vast array of non-religious concerns and how it can be reconciled with traditional Buddhism in America.

*Your True Home* Parallax Press

The secret to happiness is to acknowledge and transform suffering, not to run away from it. Here, Thich Nhat Hanh offers practices and inspiration transforming suffering and finding true joy. Thich Nhat Hanh acknowledges that because suffering can feel so bad, we try to run away from it or cover it up by consuming. We find something to eat or turn on the television. But unless we're able to face our suffering, we can't be present and available to life, and happiness will continue to elude us. Nhat Hanh shares how the practices of stopping, mindful breathing, and deep concentration can generate the energy of mindfulness within our daily lives. With that energy, we can embrace pain and calm it down, instantly bringing a measure of freedom and a clearer mind. *No Mud, No Lotus* introduces ways to be in touch with suffering without being overwhelmed by it. "When we know how to suffer," Nhat Hanh says, "we suffer much, much less." With his signature clarity and sense of joy, Thich Nhat Hanh helps us recognize the wonders inside us and around us that we tend to take for granted and teaches us the art of happiness.

*Buddha Mind, Buddha Body* Oxford University Press

Jesus, Moses, Mohammed, Gandhi, and the Buddha all had brains built essentially like anyone else's, yet

they were able to harness their thoughts and shape their patterns of thinking in ways that changed history. With new breakthroughs in modern neuroscience and the wisdom of thousands of years of contemplative practice, it is possible for us to shape our own thoughts in a similar way for greater happiness, love, compassion, and wisdom. *Buddha's Brain* joins the forces of modern neuroscience with ancient contemplative teachings to show readers how they can work toward greater emotional well-being, healthier relationships, more effective actions, and deepened religious and spiritual understanding. This book will explain how the core elements of both psychological well-being and religious or spiritual life—virtue, mindfulness, and wisdom—are based in the core functions of the brain: regulating, learning, and valuing. Readers will also learn practical ways to apply this information, as the book offers many exercises they can do to tap the unused potential of the brain and rewire it over time for greater peace and well-being.

*The Mindfulness Survival Kit* Oxford University Press

A renowned philosopher of the mind, also known for his groundbreaking work on Buddhism and cognitive science, Evan Thompson combines the latest neuroscience research on sleep, dreaming, and meditation with Indian and Western philosophy of mind, casting new light on the self and its relation to the brain. Thompson shows how the self is a changing process, not a static thing. When we are awake we identify with our body, but if we let our mind wander or daydream, we project a mentally imagined self into the remembered past or anticipated future. As we fall asleep, the impression of being a bounded self distinct from the world dissolves, but the self reappears in the dream state. If we have a lucid dream, we no longer identify only with the self within the dream. Our sense of self now includes our dreaming self, the "I" as dreamer. Finally, as we meditate—either in the waking state or in a lucid dream—we can observe whatever images or thoughts arise and how we tend to identify with them as "me." We can also experience sheer awareness itself, distinct from the changing contents that make up our image of the self. Contemplative traditions say that we can learn to let go of the self, so that when we die we can witness its dissolution with equanimity. Thompson weaves together neuroscience, philosophy, and personal narrative to depict these transformations, adding uncommon depth to life's profound questions. Contemplative experience comes to illuminate scientific findings, and scientific evidence enriches the vast knowledge acquired by contemplatives.

*Radical Acceptance* Parallax Press

This volume is a stimulating series of spiritual reflections which will prove helpful for all struggling to find the meaning of human existence and to live the richest, fullest and noblest life. --Chicago Tribune

*Present Moment Wonderful Moment* Orbis Books

*The Art of Mindful Gardening* explores the activity of gardening as an exercise for both body and mind. Ark Redwood, head gardener at Chalice Well, one of Britain's most sacred gardens, guides you through the changing seasons, expanding your knowledge of how to be conscious of the living and providing expert insight on meditating in your natural environment. This book will be essential reading for those looking to add a mindful dimension to the experience of gardening.

*Buddha Mind, Buddha Body* iUniverse

Zen teacher Glen Schneider has developed a series of simple practices to help us cultivate happiness and fulfillment in the course of our daily lives. Happiness is far more than a positive feeling that comes and goes, happiness is wired into the physiology of our brains. It is a skill we can all develop through cultivating mindfulness and concentration. In *Ten Breaths to Happiness* Schneider presents a series of simple practices and guided meditations that allow you to literally rewire your neural pathways to experience deeper and more lasting fulfillment and peace. Studies in neuroscience show that it takes about thirty seconds to build a new neural-pathway. Schneider takes these findings and combines them with mindfulness practices based on the teachings of Zen teacher Thich Nhat Hanh. For example, he encourages us to take ten conscious breaths whenever we encounter something beautiful or have a meaningful experience. Consistently exercising this simple practice creates an opportunity for the brain to move from its default reaction of protection to one of appreciation and spaciousness. In ten short chapters, Schneider discusses the nature of happiness and its role in our evolution. He shows how our brains can make us happy or create suffering, and he introduces simple, proven techniques that will shape our brains over time to experience more joy and be more fulfilled in everyday life. Written for adults new to meditation as well as those with previous meditation experience, *Ten Breaths to Happiness* is a practical, highly accessible book that not only brings us up-to-date with the latest developments in neuroscience but offers simple exercises that can be done anywhere, any time, to help 'rewire our brains' and maximize our potential.

*Mind Is Your Business* Oxford University Press, USA

*Buddha and Einstein Walk Into a Bar* presents the revolutionary idea that sensing how long we can live is a latent capacity in us, currently unknown, just like the introduction of fire, the invention of flying, and the discovery of radio waves were before we "discovered" them. Understand how the knowledge of transcendence, consciousness, and self-healing are integral to your well-being. You could drive a car without a fuel gauge, but knowing how much gas you have clearly gives you more control of your vehicle. Using the latest breakthroughs in cosmology, neuroplasticity, superstring theory, and epigenetics, *Buddha and Einstein Walk Into a Bar* helps you to master your entire system of mind, body, and energy and provides practical tools to help you live your longest and healthiest life. You will learn Lifespan Seminar's multiple-award-winning tools of: Exercises that align the different systems of the body. Mindfulness and meditation—to relieve daily stress. Good nutrition—simple rules sustainable for a lifetime. Proper rest—for your mental and physical peak performance. Active lifestyle—to stay vibrant through your entire life.

A groundbreaking exploration of the neuroscience of spirituality and a bold new paradigm for health, healing, and resilience—from a New York Times bestselling author and award-winning researcher "A new revolution of health and well-being and a testament to, and celebration of, the power within."—Deepak Chopra, MD Whether it's meditation or a walk in nature, reading a sacred text or saying a prayer, there are many ways to tap into a heightened awareness of the world around you and your place in it. In *The Awakened Brain*, psychologist Dr. Lisa Miller shows you how. Weaving her own deeply personal journey of awakening with her groundbreaking research, Dr. Miller's book reveals that humans are universally equipped with a capacity for spirituality, and that our brains become more resilient and robust as a result of it. For leaders in business and government, truth-seekers, parents, healers, educators, and any person confronting life's biggest questions, *The Awakened Brain* combines cutting-edge science (from MRI studies to genetic research, epidemiology, and more) with on-the-ground application for people of all ages and from all walks of life, illuminating the surprising science of spirituality and how to engage it in our lives: • The awakened decision is the better decision. With an awakened perception, we are more creative, collaborative, ethical, and innovative. • The awakened brain is the healthier brain. An engaged spiritual life enhances grit, optimism, and resilience while providing insulation against addiction, trauma, and depression. • The awakened life is the inspired life. Loss, uncertainty, and even trauma are the gateways by which we are

---

invited to move beyond merely coping with hardship to transcend into a life of renewal, healing, joy, and fulfillment. Absorbing, uplifting, and ultimately enlightening, *The Awakened Brain* is a conversation-starting saga of scientific discovery packed with counterintuitive findings and practical advice on concrete ways to access your innate spirituality and build a life of meaning and contribution.

**Against Common Sense** Random House

Revered Zen Buddhist teacher and best-selling author Thich Nhat Hanh explores the connection between psychology, neuroscience, and meditation. In his previous book *Understanding Our Mind*, Zen monk Thich Nhat Hanh explored Buddhist psychology and its applications in everyday life. Here, he continues that study by asking, "Is free will possible?" as he examines how the mind functions and how we can work with it to cultivate more freedom and understanding, be in closer touch with reality, and create the conditions for our own happiness. Drawing stories from the life of the Buddha and Hanh's own experiences, *Buddha Mind, Buddha Body* addresses such topics as:

- The importance of creativity and visualization in a meditation practice
- Basic Buddhist meditation practices such as sitting and walking meditation
- The importance of brotherhood and sisterhood in everyday life

Delivered in Hanh's inimitable light, clear, and often humorous style, *Buddha Mind, Buddha Body* will appeal to those new and familiar with Buddhist psychology.

**Seeds of Love** Routledge

Drawing on his own experience teaching diverse grades and subjects, Kevin Kumashiro examines aspects of teaching and learning toward social justice, and suggests concrete implications for K-12 teachers and teacher educators.

**The Awakened Brain** Parallax Press

For many of us, feelings of deficiency are right around the corner. It doesn't take much--just hearing of someone else's accomplishments, being criticized, getting into an argument, making a mistake at work--to make us feel that we are not okay. Beginning to understand how our lives have become ensnared in this trance of unworthiness is our first step toward reconnecting with who we really are and what it means to live fully. —from *Radical Acceptance* "Believing that something is wrong with us is a deep and tenacious suffering," says Tara Brach at the start of this illuminating book. This suffering emerges in crippling self-judgments and conflicts in our relationships, in addictions and perfectionism, in loneliness and overwork—all the forces that keep our lives constricted and unfulfilled. *Radical Acceptance* offers a path to freedom, including the day-to-day practical guidance developed over Dr. Brach's twenty years of work with therapy clients and Buddhist students. Writing with great warmth and clarity, Tara Brach brings her teachings alive through personal stories and case histories, fresh interpretations of Buddhist tales, and guided meditations. Step by step, she leads us to trust our innate goodness, showing how we can develop the balance of clear-sightedness and compassion that is the essence of *Radical Acceptance*. *Radical Acceptance* does not mean self-indulgence or passivity. Instead it empowers genuine change: healing fear and shame and helping to build loving, authentic relationships. When we stop being at war with ourselves, we are free to live fully every precious moment of our lives.

**No Man is an Island** HarperCollins

With poetry and clarity, Thich Nhat Hanh imparts comforting wisdom about the nature of suffering and its role in creating compassion, love, and joy – all qualities of enlightenment. "Thich Nhat Hanh shows us the connection between personal, inner peace, and peace on earth."—His Holiness the Dalai Lama In *The Heart of the Buddha's Teaching*, now revised with added material and new insights, Nhat Hanh introduces us to the core teachings of Buddhism and shows us that the Buddha's teachings are accessible and applicable to our daily lives. Covering such significant teachings as the Four Noble Truths, the Noble Eightfold Path, the Three Doors of Liberation, the Three Dharma Seals, and the Seven Factors of Awakening, *The Heart of the Buddha's Teaching* is a radiant beacon on Buddhist thought for the initiated and uninitiated alike.

**The Art of Mindful Gardening** Parallax Press

*How to Love* is the third title in Parallax's *Mindfulness Essentials Series* of how-to titles by Zen Master Thich Nhat Hanh, introducing beginners and reminding seasoned practitioners of the essentials of mindfulness practice. This time Nhat Hanh brings his signature clarity, compassion, and humor to the thorny question of how to love. He distills one of our strongest emotions down to four essentials: you can only love another when you feel true love for yourself; love is understanding; understanding brings compassion; deep listening and loving speech are key ways of showing our love. Pocket-sized, with original two color illustrations by Jason DeAntonis, *How to Love* shows that when we feel closer to our loved ones, we are also more connected to the world as a whole. With sections on Love vs. Need, Being in Love, Reverence, Intimacy, Children and Family, Reconciling with Parents, and more, *How to Love* includes meditations you can do alone or with your partner to go deep inside and expand your own capacity to love. Scientific studies indicate that meditation contributes tremendously to well-being, general health, and longevity. *How to Love* is a unique gift for those who want a comprehensive yet simple guide to understanding the many different kinds of love, along with meditative practices that can expand the understanding of and capacity for love, appropriate for those practicing in any spiritual tradition, whether seasoned practitioners or new to meditation.
