Does the prospect of preparing your school district's budget seem daunting? Beginning school administrators, often having only one theoretical course on the subject under their belt, see the budget development process as a nightmare. New administrators, teachers, and board members who have little experience with budgeting are justifiably concerned by the prospect of their involvement in budgeting. This book leads the reader through all stages of the process, from the theoretical underpinnings (history, types of budgets, etc.) and practical considerations (revenue planning, budget calendar, etc.) through to the adoption of the budget and its implementation. Includes sample budgets, and tips for administration of a budget once it is in place.

Some of the best writings on public budgeting and finance

can be found in the journals that ASPA publishes or sponsors. For this volume editor Irene Rubin has brought together the best of these articles - emerging classics that address the most important theoretical and practical problems underlying public budgeting. The anthology is organized topically rather than historically, with an effort to delineate the issues needed to understand some of the more recent controversies in the field. Rubin's introductory essay and section opens frame the key issues and provide historical context for each article. The collection begins with descriptions of what public budgeting is, where it comes from, and what it is for. It

moves on to the relationship between budget processes and outcomes, constraints on budgeting, the legal context in which it operates, and adaptations to those constraints such as contracting out. The book concludes with a discussion of the ethics and norms that underlie budgeting in a democracy. Throughout the anthology, the emphasis is on areas of disagreement and debate, so students can get involved and explore different viewpoints.

Aaron Wildavsky's greatest concern, as expressed in his writings, is how people manage to live together. This concern may at first appear to have little to do with the study of budgeting, but for Wildavsky budgeting made living together possible. Indeed, as he argues here, if you cannot budget, you cannot govern. Budgeting and

Governing gathers in one place a mass of material that otherwise would be lost in a wilderness of journals and edited volumes. With few exceptions, Wildavsky chose the articles in this collection. They are organized largely chronologically so that the reader can trace the progression of his thought which moved from studies of the American federal government, through comparative work, and on to placing budgeting within a broader theory of political culture. Wildavsky wrote about budgeting because in his words, "when a process involves power, authority, culture, consensus, and conflict, it captures a great deal of national political life." Wildavsky was interested in budgeting because of what it could tell us about the classic questions of politics: who gets what, how, and why? His earlier analyses focus narrowly on budgeting personnel and agency actors in answering these questions,

while in his later work the contending actors become sub-cultural types. To Wildavsky politics was about finding terms for living together in spite of ideological differences. Budgetary incrementalism helped to manage this otherwise unmanageable task. He thought synoptic budgeting and all related reforms would increase disagreement and raise the stakes, and so were unwise. Analysis had to serve politics, not try to displace it. Aaron Wildavsky is considered one of the most innovative and prolific scholars in the field of political research in our time. He was the author most recently of *Culture and Social Theory and Federalism and Political Culture*, as well as *Dilemmas of Presidential Leadership* (with Richard Ellis), *The Beleaguered Presidency*, and *Craftways: On the Organization of Scholarly Work*, all available from Transaction. Brendon Swedlow is a visiting professor in the political science department at the

University of California, Los Angeles. Joseph White is an associate professor in the Department of Health Systems Management at Tulane University Medical Center. "...this collection of essays is to show the development of the late Wildavsky's ideas on budgeting from the beginning of his career to the end....Recommended for research libraries and graduate students in public administration."-Choice
"Brendow Swedloe and Transaction Press have rendered policy scholars, budget specialists, and public managers a tremendous service by pulling together this posthumous collection of Aaron Wildavsky's writings on the vital, it often politically tense, relationship between budgeting and governing."--*Journal of Policy Analysis and Management*
