Guiao Ulices Gomez Purpose:  
The purpose of this lab was to investigate the buffer components and capacities of two consumer products. Safety: Citric acid can cause skin and eye redness, and, if ingested, provoke sore throat and abdominal pain. Sodium hydroxide is corrosive to eyes and skin, and can cause burning sensations if ingested ...  
14-Lab 14 - Buffers in Household Products - Google Docs  
Buffers are also important in certain commercial household products. Shampoo, for example,

contains buffers of citric acid and sodium hydroxide, which work to balance out the natural alkalinity of soap, which would otherwise burn the scalp. If you have a baby, you've probably noticed that applying baby lotion to his rash relieves it rather quickly. Buffers In Household Product Lab Answers  
The Buffers in Household Products Advanced Inquiry Lab Kit for AP\* Chemistry involves identifying regions in the neutralization of a polyprotic weak acid. Experiment results are used to identify buffering agents in eight household products.
