A Very Civil War is the first complete account of the important but much neglected story of Switzerland ' s civil war of 1847. Fought over issues similar to those of the American Civil War, the comparative " civility " of the Swiss war—there were fewer than one hundred casualties—is remarkable. Indeed, a war that might have destroyed Swiss union instead contributed to a sense of cohesion and established a firm foundation for modern Swiss society.

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

At a convention for the cult science fiction show *Beyond Earth*, Adrian Monk meets fans as obsessive-compulsive as he is. Though he's not preoccupied with the program, Monk can understand the phenomenon. Who wouldn't want to live in an imaginary world? But there may be a killer in the *Beyond Earth* community: Someone in a starship uniform has gunned down the show's legendary creator. Could a fan be that furious at him for selling out to Hollywood? Or is more going on behind the scenes? Luckily, Monk's agoraphobic brother, Ambrose, is an expert on the TV series, and together they'll search the earth and beyond for the murderer. That is, if Ambrose can bring himself to leave the house. A new story starring Adrian Monk by Edgar® Award-nominated screenwriter

Lee Goldberg. It's compulsive, page-turning fun. "Even if you aren't familiar with the TV series Monk, this book is too funny to not be read."—The Weekly Journal

The use of trace elements to promote biogas production features prominently on the agenda for many biogas-producing companies. However, the application of the technique is often characterized by trial-and-error methodology due to the ambiguous and scarce basic knowledge on the impact of trace elements in anaerobic biotechnologies under different process conditions. This book describes and defines the

broad landscape in the research area of trace elements in anaerobic biotechnologies, from the level of advanced chemistry and single microbial cells, through to engineering and bioreactor technology and to the fate of trace elements in the environment. The book results from the EU COST Action on 'The ecological roles of trace metals in anaerobic biotechnologies'. Trace elements in anaerobic biotechnologies is a critical, exceptionally complex and technical challenge. The challenging chemistry underpinning the availability of trace elements for biological uptake is very poorly understood, despite the importance of trace elements for successful anaerobic operations across the bioeconomy. This book discusses and places a common understanding of this challenge, with a strong focus on technological tools and solutions. The group of contributors brings together chemists with engineers, biologists, environmental scientists and mathematical modellers, as well as industry representatives, to show an up-to-date vision of the fate of trace elements on anaerobic biotechnologies.

Monk's house is being fumigated, and he has nowhere to go. Fortunately, his assistant Natalie and her daughter are kind enough to welcome him into their home. Unfortunately, their home is not quite up to Monk's

standards of cleanliness and order. But while Monk attempts to arrange his surroundings just so, something else needs to be put straight. The death of a dog at the local firehouse-on the same night as a fatal house fire-has led Monk into a puzzling mystery. And much to his horror, he's going to have to dig through a lot of dirt to find the answer.

The companion to Allister Sparks's award-winning *The Mind of South Africa*, this book is an extraordinary account from South Africa's premier journalist of the negotiating process that led to majority rule. *Tomorrow is Another Country* retells the story of the behind-the-scenes collaborations that started with a meeting between Kobie Coetsee, then minister of justice, and Nelson Mandela in 1985. By 1986, negotiations involved senior government officials, intelligence agents, and the African National Congress. For the next four years, they assembled in places such as a gamepark lodge, the Palace Hotel in Lucerne, Switzerland, a fishing hideaway, and even in a hospital room. All the while, De Klerk's campaign assured white constituents nothing would change. Sparks shows how the key players, who began with little reason to trust one another, developed friendships which would later play a crucial role in South Africa's struggle to end apartheid. "A gripping, fast-paced, authoritative account of the long and mostly secret negotiations that brought South Africa's bitter conflict to its near-miraculous end. Sparks's description of these talks sometimes brings a lump to one's throat. He shows how the participants' deep mutual suspicion was gradually replaced by excitement at the prospect of making a momentous agreement—and also by the dawning realization that the people on the other side were human beings, perhaps even decent human beings."—Adam Hochschild, *New York Times Book Review*

"A splendid and original history. . . . Sparks's skillful weaving of myriad strands—Mandela's secret sessions with the committee, the clandestine talks in England between the African National Congress and the government, the back-channel communications between Mandela and the A.N.C. in exile, the trepidation of Botha and the apparent transformation of his successor, De Klerk—possesses the drama and intrigue of a diplomatic whodunit."—Richard Stengel, *Time*

"Sparks offers many reasons for hope, but the most profound of them is the story this book tells."—Jacob Weisberg, *Washington Post*

"The most riveting of the many [accounts] that have been published about the end of apartheid."—*The Economist*

Challenging European cultural conventions, the work of Swiss-Bolivian artist Carmen Perrin is infused with fine undertones and references to her Latin American roots. In her preference for industrial mass-produced materials she transposes electric wire, cables and building materials into a subtle, ambiguous imagery and sculptures which activate the surrounding space. This publication presents 15 of her most important art-in-architecture interventions: in the Zurich headquarters of the Swiss National Bank, the Dock Midfield Terminal of Zurich-Kloten Airport, Lucerne's Gynaecological Hospital and further projects in France, Brazil, USA (New York) and Switzerland. Carmen Perrin, born in Bolivia

in 1953, emigrated to Switzerland in 1960. She now lives in France and teaches at Geneva's Ecole Supérieure des Beaux-Arts. Das Werk der Schweizer Künstlerin (*1953) hinterfragt die kulturellen Konventionen Europas und ist von feinen Untertönen durchzogen, die auf ihre lateinamerikanische Herkunft verweisen. Perrin verwendet mit Vorliebe industriell gefertigte Materialien und überführt sie in eine vieldeutige Bildsprache. Ihre skulpturalen Setzungen aktivieren den Raum. Die vorliegende Monografie stellt 15 der wichtigsten Kunst-am-Bau-Projekte Carmen Perrins vor: Interventionen in der Frauenklinik in Luzern, im Zürcher Sitz der Schweizer Nationalbank und im neuen Flughafenterminal Dock Midfield in Zürich-Kloten sowie weitere Projekte in der Schweiz, in Frankreich, Brasilien und New York."
