[Honda K engine - Wikipedia](#)

The Honda K-series engine is a line of four-cylinder four-stroke car engine introduced in 2001. The K-series engines are

equipped with DOHC valvetrains and use roller rockers to reduce friction.

The 500 Horsepower Naturally Aspirated K24 Engine by 4Piston

First introduced to the US as the engine for the 2002 Acura RSX and Civic Si, The K Series has proven itself a venerable, torque-strong powerplant. The K is a significant departure from the tried-and-true B series in several ways: In addition to VTEC, the K has variable cam timing.

The Honda K20 engine is actually more like a  
family of engines that was first introduced in  
2001. This engine series, the K-series, replaced  
the B-series of engines that had previously  
been used in these applications for 12 years..

The K20 engine series has a number of  
variants, typically after the K20A they start  
getting numbered and count up, although some  
other names do exist.
