Based on Honda K-series architecture, 4 Piston begins with a production K24A1 block from an Acura TSX. The block, although a factory casting, undergoes major surgery to prepare it for nearly a five-time boost in power. The engine is treated to full machining and the installation of ductile iron cylinder liners from Ramey Racing.

The B- and K-series engines both have thoroughly over-engineered blocks that can live with gobs more horsepower than Honda ever intended. But, when compared side-by-side, the K-series is clearly the more innovative and perfected platform — and why wouldn't it be? It's ten years the junior and the natural evolution of the B-series motor.

The Honda K series of engines is one of our favorites and one of the top production inline 4 engines ever produced in our opinion. Last year we built a turbo K24 Z7 for a giveaway by Motovicity. With the turbo project being put to bed we got another opportunity to build a K motor, this time in the form of

a naturally aspirated K24 Z7.
