We work with your vet to ensure that the analysis informs

your on farm decisions.

## Bull Semen Collection And Analysis For Artificial Insemination

The semen collected via electroejaculation is not representative of a full ejaculate in regard to volume and concentration, and thus the sperm production potential of the bull is based on the evaluation of SC.

Conversely, sperm quality (motility and morphology) does not differ from that in an ejaculate collected with an AV.

Sperm quality in frozen beef and dairy bull semen | Acta ...

Semen is most commonly collected from bulls in bull studs using an artificial vagina, as described below. Electroejaculation is an alternative method used with bulls that cannot mount or are too fractious for easy

---

handling (e.g. range bulls). Finally, semen can be collected by massage of the seminal vesicles and ampullae per rectum.

#### Collection and Evaluation of Semen

There is speculation that beef bull semen quality is inferior to that of dairy bulls although few scientific studies are available in the literature. The aim of this study was to evaluate sperm quality in beef bull semen and to determine which parameters could be indicative of fertility after insemination. Sperm quality, assessed by computer assisted sperm motility analysis and flow cytometric evaluation of

membrane integrity, levels of reactive oxygen species, mitochondrial membrane ...
