HarperCollins
From the creator
of the popular

website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that

people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party

Praise for *Ask a Manager* “A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review)

“The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal

How could
General
Electric--perhaps
America's most
iconic
corporation--suffer
such a swift and
sudden fall from
grace? This is the
definitive history
of General
Electric's epic
decline, as told by
the two Wall
Street Journal
reporters who
covered its fall.
Since its founding
in 1892, GE has
been more than
just a corporation.
For generations, it
was job security, a
solidly safe
investment, and
an elite business

education for top
managers. GE
electrified
America, powering
everything from
lightbulbs to
turbines, and
became fully
integrated into the
American societal
mindset as few
companies ever
had. And after two
decades of
leadership under
legendary CEO
Jack Welch, GE
entered the twenty-
first century as
America's most
valuable
corporation. Yet,
fewer than two
decades later, the
GE of old was
gone. Lights
Out examines how
Welch's

handpicked
successor, Jeff
Immelt, tried to fix
flaws in Welch's
profit machine,
while stumbling
headlong into
mistakes of his
own. In the end,
GE's traditional
win-at-all-costs
driven culture
seemed to lose its
direction, which
ultimately caused
the company's
decline on both a
personal and
organizational
scale. Lights Out
details how one of
America's all-time
great companies
has been reduced
to a cautionary tale
for our times.

the author of
The Laws of

Human Nature.
In the book
that People
magazine
proclaimed
"beguiling" and
"fascinating,"
Robert Greene
and Joost
Elffers have
distilled three
thousand years
of the history
of power into
48 essential
laws by drawing
from the
philosophies of
Machiavelli,
Sun Tzu, and
Carl Von
Clausewitz and
also from the
lives of
figures ranging
from Henry
Kissinger to
P.T. Barnum.
Some laws teach
the need for
prudence ("Law
1: Never
Outshine the

Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
