

Business Feasibility Study Rmit University

This is likewise one of the factors by obtaining the soft documents of this Business Feasibility Study Rmit University by online. You might not require more period to spend to go to the books instigation as skillfully as search for them. In some cases, you likewise pull off not discover the declaration Business Feasibility Study Rmit University that you are looking for. It will entirely squander the time.

However below, considering you visit this web page, it will be therefore no question easy to acquire as skillfully as download lead Business Feasibility Study Rmit University

It will not tolerate many epoch as we explain before. You can realize it even if work something else at house and even in your workplace. suitably easy! So, are you question? Just exercise just what we offer below as skillfully as review Business Feasibility Study Rmit University what you later to read!

[Proceedings of the FISITA 2012 World Automotive Congress](#) IGI Global

Welfare is commonly conceptualized in socio-economic terms of equity, highlighting distributive issues within growing economies. While GDP, income growth and rising material standards of living are normally not questioned as priorities in welfare theories and policy making, there is growing evidence that Western welfare standards are not generalizable to the rest of the planet if environmental concerns, such as resource depletion or climate change, are considered. Sustainability and the Political Economy of Welfare raises the issue of what is required to make welfare societies ecologically sustainable. Consisting of three parts, this book regards the current financial, economic and political crisis in welfare state institutions and addresses methodological, theoretical and wider conceptual issues in integrating sustainability. Furthermore, this text is concerned with the main institutional obstacles to the achievement of sustainable welfare and wellbeing, and how these may feasibly be overcome. How can researchers assist policymakers in promoting synergy between economic, social and environmental policies conducive to globally sustainable welfare systems? Co-authored by a variety of cross-disciplinary contributors, a diversity of research perspectives and methods is reflected in a unique mixture of conceptual chapters, historical analysis of different societal sectors, and case studies of several EU countries, China and the US. This book is well suited for those who are interested in and study welfare, ecological economics and political economy. Handbook of Research on Software for Gifted and Talented School Activities in K-12 Classrooms National Library Australia University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers and scholars.

Advances in Bias and Fairness in Information Retrieval Springer

"The book presents a comprehensive introduction of the concepts and practices of e-entrepreneurship and e-innovation"--Provided by publisher.

Against the backdrop of globalization, digitalization, and the new entrance of Generation Z on the labor market, the economic environment has started to become more dynamic, complex, and uncertain. New management, marketing, and accounting tools and strategies are needed to improve a company's sustainability in the current collaborative economy. Strategies for Business Sustainability in a Collaborative Economy is a collection of innovative research that focuses on organizational tools and practices that may foster a company's success in the new economic context, which is defined by the faster pace of technological progress and the entrance of Generation Z on the labor market. Thus, it analyzes how Generation Z transforms human resources policies and practices and how they change the concept of sustainability through their needs and expectations. Highlighting a wide range of topics including resource management, knowledge-based firms, and business models, this publication examines how business models evolve given the success recorded by newer companies. This book is ideally designed for entrepreneurs, executives, managers, economists, academicians, researchers, and students.

Protecting the Future Manchester University Press

As space ventures have become more numerous, leading scientists and theorists have offered ways of building a living habitat in a hostile environment, taking an 'ecosystems' view of space colonization. The contributors to this volume take a radical multi-disciplinary view of the challenge of human space colonization through

the ongoing project Persephone. This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life-promoting. Readers will learn the details of the plans for Persephone – a real project that is part of the company Icarus Interstellar's plans for the design and engineering of a living interior on a worldship to be constructed in Earth's orbit within 100 years. Although the timeframe itself is only an estimate, since it is contingent on many significant developments, including funding and technological advances, the industry consensus is that within 100 years we will see manned space exploration beyond our solar system. This notion is shared by organizations such as the Initiative for Interstellar Studies and the DARPA-funded 100-year starship project. This book specifically develops the principles for the construction of a living habitat within a worldship – a multi-generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light. Far from being a sterile industrial setup, such as the ISS, or even being a bucolic suburbia as proposed by Gerard O'Neill in the 1970s, this worldship will provide the pre-conditions for sustaining life beyond Earth's environment, which may also lead to the evolution of non-terrestrial ecologies. Drawing on the principles of ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction, this book proposes first designing the soils of such a space. It should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle - perhaps in spreading life throughout the universe. Although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds. Chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead from different angles.

[Interactive Sports Technologies](#) IGI Global

Building on the unfolding and expanding embeddedness of digital technologies in all aspects of life, Interactive Sports Technologies: Performance, Participation, Safety focuses on the intersection of body movement, physical awareness, engineering, design, software, and hardware to capture emerging trends for enhancing sports and athletic activities. The accessible and inspiring compilation of theoretical, critical, and phenomenological approaches utilizes the domain of sports to extend our understanding of the nexus between somatic knowledge and human-computer interaction in general. Within this framework, the chapters in this volume draw upon a variety of concepts, processes, practices, and elucidative examples to bring together a timely assessment of interactive technologies' potential to facilitate increased performance, participation, and safety in sports. This collection of chapters from international authors presents diverse perspectives from a wide range of academic and practice-based researchers within a comprehensive coverage of sport disciplines.

The use of financial concepts and tools to shape development is hardly new, but their recent adoption by advocates of sustainable environmental management has created opportunities for innovation in business and regulatory groups. The Handbook of Environmental and Sustainable Finance summarizes the latest trends and attitudes in environmental finance, balancing empirical research with theory and applications. It captures the evolution of environmental finance from a niche scholarly field to a mainstream subdiscipline, and it provides glimpses of future directions for research. Covering implications from the Kyoto and Paris Protocols, it presents an intellectually cohesive examination of problems, opportunities, and metrics worldwide. Introduces the latest developments in environmental economics, sustainable accounting work, and environmental/sustainable finance Explores the effects of environmental regulation on the economy and businesses Emphasizes research about the trade-environmental regulation nexus, relevant for economics and business students

Vietnam is a dynamic member of the community of Southeast Asian nations. Consistent with

aspirations across the region, it is seeking to develop its higher education system as rapidly as possible. Vietnam's approach stands out, however, as being extremely ambitious. Indeed, it may be at risk of attempting to do too much too quickly. By 2020, for example, Vietnam expects its higher education system to be advanced by modern standards and highly competitive in international terms. This vision faces many challenges. The economy, though growing rapidly, remains reliant on the availability of unskilled labour and the exploitation of natural resources, and decision making in many areas of public life continues to be hamstrung by a legacy of over-regulation and centralised control. A large number of goals and objectives have been set for reform of the higher education system by 2020. The success of these reforms will have a major bearing on the future quality of the system. This sober assessment Vietnam's global competitiveness forms a backdrop to the subject matter of this book, that is, the state of Vietnam's higher education system. The book provides a comprehensive and scholarly review of various dimensions of the higher education system in Vietnam, including its recent history, its structure and governance, its teaching and learning culture, its research and research commercialisation environment, its socio-economic impact, its strategic planning processes, its progress with quality accreditation, and its experience of internationalisation and privatisation.

This book contains the contributions presented at the ninth international KES conference on Intelligent Interactive Multimedia: Systems and Services, which took place in Puerto de la Cruz, Tenerife, Spain, June 15-17, 2016. It contains 65 peer-reviewed book chapters that focus on issues ranging from intelligent image or video storage, retrieval, transmission and analysis to knowledge-based technologies, from advanced information technology architectures for video processing and transmission to advanced functionalities of information and knowledge-based services. We believe that this book will serve as a useful source of knowledge for both academia and industry, for all those faculty members, research scientists, scholars, Ph.D. students and practitioners, who are interested in fundamental and applied facets of intelligent interactive multimedia.

This book examines language choice in contemporary Cambodia. It uses the spread of English, and French attempts at thwarting it in favor of their own language, to study and evaluate competing explanations for the spread of English globally. The book focuses on language choice and policy, and will appeal to scholars in comparative education where language and language policy studies represent a growing area of research interest.

[Handbook of Environmental and Sustainable Finance](#) Springer Science & Business Media

As technology continues to play a pivotal role in society, education is a field that has become heavily influenced by these advancements. New learning methods are rapidly emerging and being implemented into classrooms across the world using software that is low cost and easy to handle. These tools are crucial in creating skillful learning techniques in classrooms, yet there is a lack of information and research on the subject. The Handbook of Research on Software for Gifted and Talented School Activities in K-12 Classrooms is an essential reference source that discusses newly developed but easy-to-handle and less costly software and tools and their implementation in real 21st-century classrooms worldwide. The book also helps and supports teachers to conduct gifted and talented school activities in K-12 classrooms. Featuring research on topics such as educational philosophy and skillful learning techniques, this book is ideally designed for software developers, educators, researchers, psychologists, instructional designers, curriculum developers, principals, academicians, and students seeking coverage on the emerging role that newly developed software plays in early education.

This book constitutes refereed proceedings of the Third International Workshop on Algorithmic Bias in Search and Recommendation, BIAS 2022, held in April, 2022. The 9 full papers and 4 short

papers were carefully reviewed and selected from 34 submissions. The papers cover topics that go from search and recommendation in online dating, education, and social media, over the impact of gender bias in word embeddings, to tools that allow to explore bias and fairness on the Web. .
[Australian National Bibliography: 1992](#) Springer Science & Business Media
Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis, (CINDAS) at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity was transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 19 (thesis year 1974) a total of 10,045 theses titles from 20 Canadian and 209 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. The organization of Volume 19 is identical to that of past years. It consists of theses titles arranged by discipline and by university within each discipline.

Proceedings of the FISITA 2012 World Automotive Congress are selected from nearly 2,000 papers submitted to the 34th FISITA World Automotive Congress, which is held by Society of Automotive Engineers of China (SAE-China) and the International Federation of Automotive Engineering Societies (FISITA). This proceedings focus on solutions for sustainable mobility in all areas of passenger car, truck and bus transportation. Volume 4: Future Automotive Powertrain (II) focuses on: •Advanced Battery Technology •Hydrogen Fuel Cell Vehicle •Charging Infrastructure and Smart Grid Technology •Demonstration of Electric Vehicles in Cities Above all researchers, professional engineers and graduates in fields of automotive engineering, mechanical engineering and electronic engineering will benefit from this book. SAE-China is a national academic organization composed of enterprises and professionals who focus on research, design and education in the fields of automotive and related industries. FISITA is the umbrella organization for the national automotive societies in 37 countries around the world. It was founded in Paris in 1948 with the purpose of bringing engineers from around the world together in a spirit of cooperation to share ideas and advance the technological development of the automobile.

It focuses on Greek history, literature, culture, the presence and contributions of Greek Americans to the economy and society, contemporary issues and relations between the USA and Greece.

Employability via Higher Education: Sustainability as Scholarship CSIRO PUBLISHING
Tenth and final volume in the C-2-C series, it provides an introduction to the intermeshed issues surrounding knowledge and learning, focusing on the particular case of the printing and publishing industries. It defines knowledge management in general terms, and relates knowledge management to the specifics of this industry sector. It discusses the role of formal documentation in the development of explicit knowledge management systems, and the essential role of publishing and content dissemination within the processes of knowledge management. It also draws links between knowledge management and new forms of learning, be these organisational learning or personal learning. Includes notes on contributors, diagrams, notes and references. Publication is a joint project of the publisher and RMIT University, based on research funded under the Infrastructure and Industry Competitiveness Scheme (EPICS) of the Commonwealth Department of Industry, Science and Resources. Published in both paperback and downloadable PDF format.

Concurrent Engineering Approaches for Sustainable Product Development in a Multi-Disciplinary Environment IGI Global

The book is a collection of academic papers from a conference that focuses on significant issues, fundamental and applied research advances on a range of topics in the areas of textile engineering, apparel, fashion and design. Among others, the book will update the readers on recent research in technical and functional textiles; future trends and visions for textile, apparel and fashion; global business, marketing and management in textile and apparel; education and training in textile and apparel and design, fashion, footwear product and materials innovation.
