Dr Roger Harvey, a high-flyer headed for the academic first division, has pursued his

career and women with equal passion. But now he's just another murder statistic; his body has been lying in his flat for four days when a small-time burglar literally stumbles over it on his way out with the stereo. DS Ian Kerr and DCI Jacobson of Crowby CID can discern no obvious motive. Harvey didn't do serious drugs or have a criminal record. Not even Harvey's closest friends, John Kent and his beautiful wife, Annie, seem able to throw any light on the situation. Despite Jacobson's dependence on booze and

fags, and the fact that Kerr's marriage is disintegrating faster than his boss's liver, the two men are experienced policemen. But to solve the case they have to untangle the dark threads of a mystery which threatens to unravel in seemingly every direction . . . Business Law I Essentials Routledge Are political understandings of bureaucracy incompatible with Weberian features of administrative neutrality? In examining the question of whether interest groups and elected officials are able to influence how government agencies implement the law, this book identifies the political origins of bureaucratic neutrality. In bridging the traditional gap between questions

of internal management (public administration) and external politics (political science), Huber argues that 'strategic neutrality' allows bureaucratic leaders to both manage their subordinates and sustain political support. By analyzing the OSH Act of 1970, Huber demonstrates the political origins and benefits of administrative neutrality, and contrasts it with apolitical and unconstrained administrative implementation. Historical analysis, interviews with field-level bureaucrats and their supervisors, and quantitative analysis provide a rich understanding of the twin difficulties agency leaders face as political actors and personnel managers.
