A Washington Post Notable Work of Nonfiction From the moment Chief Justice Roberts botched Barack Obama's oath of office, the relationship between the Court and the White House has

been a fraught one. Grappling with issues as diverse as campaign finance, abortion, and the right to bear arms, the Roberts court has put itself squarely at the center of American political life. Jeffrey Toobin brilliantly portrays key personalities and cases and shows how the President was fatally slow to realize the importance of the judicial branch to his agenda. Combining incisive legal analysis with riveting insider details, The Oath is an essential guide to understanding the Supreme Court of our interesting times. The Wizard and the Prophet Cengage Learning Prepared by Ronald L. Taylor of Metropolitan State College of Denver, provides a brief statement of purpose, chapter checkpoints, study tips, chapter outlines, key terms definitions, and true/false, multiple choice, and short

essay questions for each chapter. Each part has optional integrated questions and a sample test bank of twenty cumulative test questions. The Study Guide also includes a CPA exam business law review.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these

factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways.

Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Prominent Families of New York
Irwin/McGraw-Hill

From the bestselling, award-winning author of 1491 and 1493—an incisive portrait of the two little-known twentieth-century scientists, Norman Borlaug and William Vogt, whose diametrically opposed views shaped our ideas about the environment, laying the groundwork for how people in the twenty-first century will choose to live in tomorrow's world. In forty years, Earth's population will reach ten billion. Can our world support that? What kind of world will

it be? Those answering these questions generally fall into two deeply divided groups--Wizards and Prophets, as Charles Mann calls them in this balanced, authoritative, nonpolemical new book. The Prophets, he explains, follow William Vogt, a founding environmentalist who believed that in using more than our planet has to give, our prosperity will lead us to ruin. Cut back! was his mantra. Otherwise everyone will lose! The Wizards are the heirs of Norman Borlaug, whose research, in effect, wrangled the world in service to our species to produce modern high-yield crops that then saved millions from starvation. Innovate! was Borlaug's cry. Only in that way can everyone win! Mann delves into these diverging viewpoints to assess the four great challenges humanity faces--food, water, energy, climate change--grounding each in historical context and weighing the options for the future. With our

civilization on the line, the author's insightful analysis is an essential addition to the urgent conversation about how our children will fare on an increasingly crowded Earth.

Over the next week, Pindar introduces Joe to a series of successful 'go-givers' who teach him how to open

A thousand years of legal protections against tyranny are being stolen right before our eyes. Under the guise of good intentions, personal liberties as old as the Magna Carta have become casualties in the wars being waged on pollution, drugs, white-collar crime, and all of the

other real and imagined social ills. The result: innocent people caught up in a bureaucratic web that destroys lives and livelihoods; businesses shuttered because of victimless infractions; a justice system that values coerced pleas over the search for truth; bullying police agencies empowered to confiscate property without due process. "A devastating indictment of our current system of justice." — Milton Friedman In this provocative book, Paul Craig Roberts and Lawrence M. Stratton show how the law, which once shielded us from the government, has now become a powerful weapon in the hands of overzealous prosecutors and bureaucrats. Lost is the foundation upon which our freedom rest—the intricate framework of Constitutional limits that protect our property, our liberty, and our lives. Roberts and Stratton convincingly argue that this abuse of government power doesn't have ideological boundaries. Indeed, conservatives and liberals alike use prosecutors, regulators, and courts to chase after their own favorite "devils," to seek punishment over justice and expediency over freedom. The authors present harrowing accounts of people both rich and poor, of CEOs and blue-collar workers who have

fallen victim to the tyranny of good intentions, who have lost possessions, careers, loved ones, and sometimes even their lives. This book is a sobering wake-up call to reclaim that which is rightly ours—liberty protected by the rule of law.
