Hindutva is such a geo-cultural concept that has respect, place and feeling of coexistence for everybody. This synchronicity oriented cultural consciousness has made it quite liberal, tolerant and flexible. The situation deteriorated when cultures of external invaders taking advantage of the liberality of this overtolerant culture and started cutting very roots of the same. Too much permissiveness of Hindutva was treated as their cowardice and every possible effort was made to destroy all its basic elements. Even today, various kinds of conspiracies are being hatched with similar aim. Forbearance has turned the supporters and followers of 'Hindutva' i.e. 'Indianness' indifferent, impotent and fatalistic. The common-good-oriented philosophy of self-righteousness did not imply that on the level of this world and behaviour, we forget our duty towards ourselves and not be alert to self-defence. The policy of abandonment in the face of invaders has nothing to do with the philosophy and principle of coexistence and tolerance. Every time Hindutva failed to fight the invading enemies, they had to not only suffer humiliation but also live under their subjugation. Hindutva is so devoted to pursuit of truth that it does not compromise on any account. For Hindutva, existence of this world is not the real truth, rather it is an illusion; in other words, whatever is there in reality is a form of an eternal and true non-dual Brahman. -From this book

This book provides a richly documented account of the historical, cultural, philosophical and practical dimensions of feng shui. It argues that where feng shui is entrenched educational systems have a responsibility to examine its claims, and that this examination provides opportunities for students to better learn about the key features of the nature of science, the demarcation of science and non-science, the characteristics of pseudoscience, and the engagement of science with culture and worldviews. The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal. Feng shui is a deeply-entrenched, three-millennia-old system of Asian beliefs and practices about nature, architecture, health, and divination that has garnered a growing presence outside of Asia. It is part of a comprehensive and ancient worldview built around belief in chi (qi) the putative universal energy or life-force that animates all existence, the cosmos, the solar system, the earth, and human bodies. Harmonious living requires building in accord with local chi streams; good health requires replenishment and manipulation of internal chi flow; and a beneficent afterlife is

enhanced when buried in conformity with chi directions.

Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture, tai-chi and qigong exercise, and herbal dietary supplements. Matthews has produced another tour de force that will repay close study by students, scientists, and all those concerned to understand science, culture, and the science/culture nexus. Harvey Siegel, Philosophy, University of Miami, USA With great erudition and even greater fluidity of style, Matthews introduces us to this now-world-wide belief system. Michael Ruse, Philosophy, Florida State University, USA The book is one of the best research works published on Feng Shui. Wang Youjun, Philosophy, Shanghai Normal University, China The history is fascinating. The analysis makes an important contribution to science literature. James Alcock, Psychology, York University, Canada This book provides an in-depth study of Feng Shui in different periods, considering its philosophical, historical and educational dimensions; especially from a perspective of the 'demarcation problem' between science and pseudoscience. This book honors the career of historian of mathematics J.L. Berggren, his scholarship, and service to the broader community. The first part, of value to scholars, graduate students, and interested readers, is a survey of scholarship in the mathematical sciences in ancient Greece and medieval Islam. It consists of six articles (three by Berggren himself) covering research from the middle of the 20th century to the present. The remainder of the book contains studies by eminent scholars of the ancient and medieval mathematical sciences. They serve both as examples of the breadth of current approaches and topics, and as tributes to Berggren's interests by his friends and colleagues.

Ascendant is the most important element of Astronomy and Astrology. Ascendant is the fundamental factor or seed of Astrology. This is the base on which the entire mansion of Astrology or the vast banyan tree stands. The calculative portion of Astrology can be solved by computer to a great extent, but the

predictive portion is out of question. Astrology without prediction is just like a flower without fragrance. Many a time learned Astrologers and professional fortune-tellers are hesitant in giving correct predictions. The present book is intended to combat this challenge, by presenting facts and figures Ascendant-wise in separate books so that a clear and concise avenue may be opened for those who are aspiring to know what is there in store for them in the celestial world. With the help of this book people can know their future and they can foretell the future of their near and dear ones. It is our humble endeavour to bestow the common people with knowledge of Astrological prediction. Twelve (12) Ascendants arise in the sky during the course of a day and night. An Ascendant exists for roughly two (2) hours. It is the first step towards giving the prediction on the basis of Ascendant itself. It is hoped that it will be appreciated in the world of Astrology.
