Anderson Publishing Company (OH) Business, Conflict Resolution and Peacebuilding examines the actions currently being taken by businesses in areas of violent conflict around the world, and explores how they can make a significant contribution to the resolution of violent conflicts through business-based peacebuilding. This book combines two approaches to provide a comprehensive look at the current state and future of business- based peacebuilding. It marries a detailed study of documented peacebuilding activities with a map of the possibilities for future business-related

conflict work and pragmatic suggestions for business leaders, conflict resolution practitioners, and peacebuilding organizations. The use of the label 'business-based peacebuilding' is new and signifies actions business can take beyond simple legal compliance or making changes to avoid creating a conflict. Although business-based peacebuilding is new, examples are included from around the world to illustrate that, working together, businesses have a strong contribution to make to the creation of peaceful societies. The book advocates pragmatic peacebuilding, which is not overly concerned with cause-driven models of conflict. Instead, pragmatic peacebuilding encourages an examination of what is needed in the conflict and what can be provided. This approach is free of some of the ideological baggage of traditional peacebuilding and allows for a much wider range of participants in the peacebuilding project. This book will be of much interest to students of peace studies, conflict resolution, international security and business studies, as well as to practitioners and business leaders. Bank Recovery and Resolution United Nations Research Paper (undergraduate) from the year 2006 in the subject Business economics - Business Management, Corporate Governance, grade: A-, University of Applied Sciences Essen, course: Financial Management, language: English, abstract: The assignment "Corporate governance" starts with the introduction which includes the executive summary and the scope of work that is realized in here. The second chapter deals with a detailed definition of the problem that causes the relevance of this assignment, the determination of the objectives as well as the methodology that describes the assignment's structured procedure.

Chapter three is focused on the basics and relevant theory of corporate governance. At this juncture in particular the principal agent, the transaction cost and the property rights theory according to corporate governance are being analyzed. Chapter four is about modern methods and concepts for managing corporate governance issues. A practical case about the Dutch company Heineken that has realized a management concept for corporate governance successfully is examined in chapter four. Finally, the results of this assignment are summarized; especially whether the set objectives are reached as well as critical comments about the assignment are given in the last chapter. Furthermore, an outlook about possible future effects of applied corporate governance systems is provided. The purpose of this assignment is to provide further research insight on a topic, which still has not yet reached saturation in terms of analysis and understanding even though there is a voluminous literature on corporate governance issues.

Settling Disputes Kluwer Law International B.V.
Bank Recovery and Resolution Second Edition Sven Schelo Since 2008, enormous efforts have been made worldwide to draft rules to prevent a reoccurrence of the devastating financial events of that year. In the process, bank business has been laid open to intense public and government scrutiny, and regulation of banking has grown to spectacular proportions. Prominent among the measures taken is the EU Bank Recovery and Resolution Directive (BRRD), which, together with the Single Resolution Mechanism (SRM) and the Single Resolution Fund, constitutes a crucial new pillar in the European Banking Union. Practitioners searching for orientation in what can

readily be perceived as a 'jungle' have an urgent need for a clear and systematic description and analysis of these new rules, which are sure to have a massive impact on bank business from this time on, not only in Europe but also wherever European business is to be found. The solidly grounded analysis in this important book sets the new rules under BRRD into their full context as cross-border phenomena. With its crystal-clear explanation of key provisions, procedures, and 'triggers', the book organises a highly complex legal system into patterns and action plans that can be applied in virtually any eventuality likely to arise in cases where bank business is of central significance. Among the topics covered are the following: – entities covered by BRRD; – exceptions under BRRD; – objective and scope of BRRD tools – bail-in, bridge bank, sale of business, asset separation; – asset quality reviews; – curing or mitigating the continuing problem of non-performing loans; – new rules as response to lack of private solutions; – banks' requirement to provide a minimum amount of eligible liabilities; – safety buffers to protect resolution; – need to be 'resolvable' in a worst case; – leverage and liquidity ratios; – forced mergers; – market spillover effects of recovery planning; – group recovery planning; – effects of foreign law contracts and assets; – write-down of capital instruments; and – special problems of cross-border restructuring. The presentation is enhanced by a comparative dimension, which includes reference to United States and other national developments and a full-scale analysis of Switzerland's regulatory response to the crisis. Given that a full seamless global system of bank recovery and resolution has not yet been found, and that major banks are global players headquartered in different jurisdictions and even different continents, this book will greatly assist in the work of practitioners who must deal with cases involving international banking under the prevailing status quo. Its usefulness to officials and academics in international banking and finance law and policy, who are working towards a global solution, is of incalculable value.
