This Handbook is a very timely contribution to organization and business studies. Most calls for longitudinal research are made in sections of published work that deal with limitations of the study or suggestions for further research. This book places longitudinal research methods at center stage. With its practical, hands-on approach it guides us how to design a longitudinal study in and around organizations whether qualitative or quantitative and how to implement it. I warmly recommend this Handbook to ambitious senior and junior researchers. It makes the commonly presented excuses for not undertaking longitudinal research completely redundant. Rebecca Piekari, Aalto University, School of Business in Helsinki, Finland This is a very timely book that fills an important gap in the field of research methods. So far very little attention has been paid to longitudinal research methods, while the usefulness of this type of research has often been discussed in many papers and conferences. Insights provided by scholars who have been

doing this type of research provide useful guidelines for anyone interested in research methods from senior scholars to young researchers and PhD candidates. This volume will serve as an excellent complement to the existing range of books on research methods. Pervez Ghauri, Kings College London, UK This innovative Handbook demonstrates that there is no single best approach to conducting longitudinal studies. At their best, longitudinal research designs yield rich, contextualised, multilevel and deep understanding of the studied phenomenon. The lack of resources in terms of time, funding and people can pose a serious challenge to conducting longitudinal research. This book tackles many of these challenges and discusses the role of longitudinal research programmes in overcoming such obstacles. This book shows how longitudinal research methods enable the understanding of dynamics, mechanisms, causalities and interrelationships of organizational and business concepts in context and in relation to time. It discusses the richness and versatility of longitudinal research and offers, to students and experienced scholars alike, numerous viewpoints, reflections and personal accounts about conducting longitudinal research, from

planning and fieldwork to reporting and managing of research projects.

In the last decade, significant changes have occurred in the field of vehicle motion planning, and for UAVs in particular. UAV motion planning is especially difficult due to several complexities not considered by earlier planning strategies: the increased importance of differential constraints, atmospheric turbulence which makes it impossible to follow a pre-computed plan precisely, uncertainty in the vehicle state, and limited knowledge about the environment due to limited sensor capabilities. These differences have motivated the increased use of feedback and other control engineering techniques for motion planning. The lack of exact algorithms for these problems and difficulty inherent in characterizing approximation algorithms makes it impractical to determine algorithm time complexity, completeness, and even soundness. This gap has not yet been addressed by statistical characterization of experimental performance of algorithms and benchmarking. Because of this overall lack of knowledge, it is difficult to design a guidance system, let alone choose the algorithm. Throughout this paper we keep in mind some of the general

characteristics and requirements pertaining to UAVs. A UAV is typically modeled as having velocity and acceleration constraints (and potentially the higher-order differential constraints associated with the equations of motion), and the objective is to guide the vehicle towards a goal through an obstacle field. A UAV guidance problem is typically characterized by a three-dimensional problem space, limited information about the environment, on-board sensors with limited range, speed and acceleration constraints, and uncertainty in vehicle state and sensor data.

The material in this book reflects, in many respects, the culmination of several years of research regarding the measurement of monetary policy. On all the issues addressed in the text, I have thus attempted to provide a perspective of the type that can only be gained from "living with" a topic over an extended time horizon. I have often said that I came to understand the monetary indicators literature only after having written dozens of papers on the subject. This statement may seem a bit trite, but I feel certain that anyone who has waded through this morass (or at least tried to) can fully empathize and recognize the grain of truth therein. It is my sincere hope that the synthesis given in the work will calm the fears

and anxieties that often (and understandably) plague beginners in this field. In settling down to the process of "pulling together" this manuscript, I was surprised to find the ease and consistency with which various topics, explored at widely diverse times and in no particular order, meshed into a unified whole. I attempted to write the book in a manner that would simultaneously be generally comprehensible to students (particularly at the graduate level) and to practitioners desiring a relatively thorough overview of the indicators literature and yet be of value to scholars desiring to explore (and hopefully advance) this field.

In his inaugural address, Governor Brereton C. Jones proclaimed, "This administration is committed to having the most positive, progressive, exciting four years in our state's history." Through speeches and press releases, this volume reflects the principal concerns of Jones's time in office. Thematically organized, the more than two hundred public statements included here present the public face

of the Jones administration on in 1992, he turned the main such issues as health care, education, economic development, the environment, and governmental reform. Nowhere else has the full text of these speeches and press releases been printed. Governor Jones, born in 1939, was elected to the West Virginia legislature in 1964, where he served for four years before retiring from politics. After moving to Kentucky and switching allegiance from the Republican to the Democratic Party, he re-entered politics with a successful campaign to become lieutenant governor in 1987. He was elected the Commonwealth's fifty-fourth governor in 1991 by a record margin of nearly two to one. Jones initiated a number of reforms once in office. He turned a \$400 million budget deficit into a \$300 million surplus in four years, and he passed dramatic ethics reform in both the executive and legislative branches. Health-care issues were also of great importance to Jones, who spent the years before his election working with the Kentucky Health Care Access Foundation in addition to farming. After surviving a helicopter crash

focus of his administration toward health-care reform and initiatives. Though he met with legislative opposition when he proposed universal health care for all Kentuckians, he did help pass legislation in 1994 that would serve as a solid beginning on the issue for future governors.

This paper examines the Six Day War, the Arab-Israeli conflict of 1967, for the purposes of highlighting applications/violations of the principles of war outlined in AFM 1-1. This material will be incorporated into an AGSC block of instruction studying the principles of war as used in famous historical battles. This paper is divided into three separate sections. The first section reviews the background of the Arab-Israeli problem and highlights some of the major events leading up to the war. This section also presents a battle synopsis of the conflict including visual depictions of the battle progress. The second section provides an analysis of the use (or misuse) of the principles of war by each side—Arab and Israeli. The final section provides some discussion questions, with

supporting rationale, in a guided discussion format for possible use in a seminar environment. The non-standard format for this project is at the request of ACSC/EDCJ to assist in building this particular block of instruction.
