Marketing strategy is constantly adapting in the changing environment of International Business. This book draws together an eminent and international body of researchers to analyse recent changes in world markets and marketing practices. It analyses, codifies and challenges existing literature on the subject; it offers industry specific studies of international marketing practices and their relative successes; and it presents valuable research findings on the increasingly important markets of China and Japan. The book is a three-fold contribution to the study and practice of International Marketing. Blending

empirical studies with critical theory, the collection sheds much desired light on this important and often-neglected area.

The growth and impact of the multinational enterprise (MNE) in the post war period is one of the most important phenomena of our time. This volume, originally published in 1981 provides a comprehensive and detailed review of both the theoretical and policy issues at a time when the subject had reached a watershed, after the controversies of the 1970s. The book provides a balanced discussion of major themes such as the

development of modern theories of international production; the impact of the MNE on the nation-state and the structure of the international market; the response of governments and the appropriate framework for policy measures; and the historical context and likely future of the MNE.
