Do you know all the hidden secrets that exist in the retail automobile business?If curiosity about the inner-most workings of the "car biz" has gotten the best of you or you are in immediate need of some money-saving tips on buying, leasing, selling or servicing a car or truck, then please use this book to prepare you for your next experience.For over 100 years, the automotive purchase experience has been a source of anxiety and discomfort to the consumer. That unfortunate circumstance was the motivating factor that caused us to write this book and to address those topics which we believe, will offer the most practical value, get some much needed information out in the open, correct some common misunderstandings and, explain those industry practices which seem to suffer most from the publics' misconceptions.The majority of questions in this book will be answered from the consumers' perspective. We also believe that folks in the auto industry will find this book to be useful and informative text .We can make that last statement because, until the auto buying public is comfortably acquainted with the industry's practices AND, the industry recognizes that an educated consumer is its' best asset, we're all destined to suffer from the anxiety, distrust, suspicion and sense of inequality that's been welded onto buying, selling and servicing a car.This book is, by many measures, the first attempt to inform the consuming public of the elements associated with the automobile industry. We have accumulated over 40 years of experience in the auto industry and determined that responding to the many questions commonly asked by automotive consumers is a public service long overdue.We attempt to answer each of the following questions and many others:WHAT SHOULD MOTIVATE ME WHEN MAKING A VEHICLE PURCHASE

Used Car Buyers' Guide to Domestic and Foreign Safety Defect Recalls, 1975-1979 The Auto Buyers Guide to Dealership Scams

This highly visual book explores the seldom-told story of how glamour, fashion, design, and styling became the main focus of automotive marketing from the postwar 1940s through the 1970s. With the expansion of the American suburbs after WWII, women suddenly needed cars of their own. By adopting the fashion industry's yearly model changes, as well as hiring many designers and stylists from the fashion industry, the automobile industry made a direct appeal to the rising sophistication and influence of women. By perfecting the fashion-centric concept of planned obsolescence, it became the dominant economic engine of American postwar prosperity. The dramatic photography, elegant fashion, and use of color and materials in midcentury automotive marketing created a groundswell of demand for new cars. Much of the marketing imagery of the period hasn't been published since it first came out, and this book features some of the best.

Buying a used car isn't what it used to be. Car-shopping doesn't have to be an ordeal anymore.

Transparency. Market-based pricing. Fair value.

Surprise! These are terms that identify today's used-car dealers. Not all of them, to be sure. Tricksters

are still around, adapting old hard-sell tactics to the digital world; but this book helps you spot them - and avoid them. Modern, progressive dealers shun the ethics-challenged, hard-sell tactics of the past, taking their business seriously and intent on satisfying their customers. They're still in it to make money, ready to drive a hard bargain. But they know that today's shoppers are better-informed than ever, typically arriving at the dealership armed with facts and figures. In this Buyer's Guide, consumers will find plenty of additional information, to help find the right car and get it for an acceptable price. They can also see how vehicle history reports and certified pre-owned (CPO) programs help reduce the risk when buying secondhand. Dealers and salespeople, too, can find useful advice on working with today's knowledgeable customers. Part I - New vs. Used: Why buy used, where to buy, whether CPO is right for you. Part II - Homework Comes First: How to narrow down your search, emphasizing vehicle condition, fuel economy, and safety. Part III - Test Drive: Questions to ask, visual inspection, road test. Part IV - Dollars and Sense: How much to pay and how to negotiate; plus details on service contracts, financing, and insurance. Part V - Resources: How to read ads, information sources, buyer's worksheet. Part VI - Popular Used Cars: Details, specifications, test-drive reports, and average retail prices of selected moderately-priced, mainstream models, arranged by vehicle category. Addendum - Further details on today's used-car market.
