Canessa North Shore Dance. How Polaroid Changed Photography Land Use Publications Co. This specialty buying guide presents easy-to-use historical profiles of some 200 models--cars, trucks, minivans, sport utility vehicles--giving readers a comprehensive view of each model as a used car. Lynn, Mass., Businesses Collection Greenwood Publishing Group In a world where nearly everyone has a cellphone camera capable of zapping countless instant photos, it can be a challenge to remember just how special and transformative Polaroid photography was in its day. And yet, there ' s still something magical for those of us who recall waiting for a Polaroid picture to develop. Writing in the context of two Polaroid Corporation bankruptcies, not to mention the obsolescence of its film,

Peter Buse argues that Polaroid was, and is, distinguished by its process—by the fact that, as the New York Times put it in 1947, “the camera does the rest.” Polaroid was often dismissed as a toy, but Buse takes it seriously, showing how it encouraged photographic play as well as new forms of artistic practice. Drawing on unprecedented access to the archives of the Polaroid Corporation, Buse reveals Polaroid as photography at its most intimate, where the photographer, photograph, and subject sit in close proximity in both time and space—making Polaroid not only the perfect party camera but also the tool for frankly salacious pictures taking. Along the way, Buse tells the story of the Polaroid Corporation and its ultimately doomed hard-copy wager against the rising tide of digital imaging technology. He explores the continuities and the differences

between Polaroid and digital, reflecting on what Polaroid can tell us about how we snap photos today. Richly illustrated, *The Camera Does the Rest* will delight historians, art critics, analog fanatics, photographers, and all those who miss the thrill of waiting to see what develops.

C. L. Franklin, the Black Church, and the Transformation of America This book is a study of UW men's basketball fans during the 2001-2002 season and explores their proclivity to 'cheering for self' during basketball events. The term 'basketball event' is used rather than 'basketball game'

to make clear that everything connected to and seen, heard, or experienced before, during and after a basketball game is included. The actual game itself is only part of the 'basketball event. An undercurrent runs throughout this participant observation mini-ethnography dealing with access, and the relative quality of that access, to basketball events being affected by ones age, class, race, and gender. The prominent role of advertising in shaping basketball events and helping to construct fans as consumers of products (both commercial and institutional) during the process of cheering for self is central to this idea. Cheering for self is the activity engaged in by individual fans after they find things to identify or connect with through personal investment. Fans cheer for self indirectly. Fans cheer for the team that they identify with. Through the process of

cheering for self while attending the basketball event people are taught how to become fans, to consume a UW product--the basketball event and to consume advertisers' products. People have a tendency to spend their entire life trying to impress others.
