purpose of association  
analysis is to find  
patterns in particular  
in business processes  
and to formulate  
suitable rules, of the  
sort "If a customer  
buys product A, that  
customer also buys  
products B and C".  
Tip. If a customer  
buys mozzarella at the  
supermarket, that  
customer also buys  
tomatoes and basil.
