The field of Soft Computing in Humanities and
Social Sciences is at a turning point. The strong

distinction between “ science ” and “ humanities ” has been criticized from many fronts and, at the same time, an increasing cooperation between the so-called “ hard sciences ” and “ soft sciences ” is taking place in a wide range of scientific projects dealing with very complex and interdisciplinary topics. In the last fifteen years the area of Soft Computing has also experienced a gradual rapprochement to disciplines in the Humanities and Social Sciences, and also in the field of Medicine, Biology and even the Arts, a phenomenon that did not occur much in the previous years. The collection of this book presents a generous sampling of the new and burgeoning field of Soft Computing in Humanities and Social Sciences, bringing together a wide array of authors and subject matters from different disciplines. Some of the contributors of the book belong to the scientific and technical areas of Soft Computing while others come from various fields in the humanities and social sciences such as Philosophy, History, Sociology or Economics. Rudolf Seising received a Ph.D. degree in philosophy of science and a postdoctoral lecture qualification (PD) in history of science from the Ludwig Maximilians University of Munich. He is an Adjoint Researcher at the European Centre for Soft Computing in Mieres (Asturias), Spain. Veronica Sanz earned a Ph.D. in Philosophy at the University Complutense of Madrid (Spain). At the moment she is a Postdoctoral Researcher at the Science, Technology and Society Center in the University of California at Berkeley. Explores music produced during
the lifetime of Duke Ellington
and the pursuit of musicians to
keep up with constantly
changing modern life.

The Ellington Century Xlibris Corporation
"There are two groups of standards that
help form the basic repertory used in jazz
improvisation. The first group was
created by jazz musicians directly from
improvisation, experimentation and the
analysis of musical forms, ideas and
practices that were developed through
study and the natural gifts of some of the
greatest musicians of the twentieth
century. This group codified jazz into
chronological styles and provides

concrete examples of its styles and
concepts. The second group of standards
is comprised of compositions written as
popular songs during the first half of the
twentieth century ... Every improviser is a
composer who makes up melodies
spontaneously. The model choruses give
examples that can be studied, learned,
broken into independent phrases and used
to create other melodies that reflect more
clearly what the improviser wants to say
musically ..."--Preface.

The Complete Discography of Louis
Armstrong Alfred Music Publishing

Here Peacocke and Pederson compose a
rhapsody on divine creativity in three
movements. Through an extended analogy,
they reveal how Christian understandings of
creation can be brightly lit by scientific
insights and approached analogously

through examining musical creativity. They also include relevant selections on an accompanying CD-ROM. Composition, fugal arrangement, rhythm and tempo, jazz improvisation all shed light on creation. Creation from nothing, continual creation, incarnate creativity, communal or ecclesial creativity, open-ended future creativity--new ways of thinking about the Christian teaching are illumined and exemplified in musical creativity from Bach to Monk:
Prelude First Movement: Creation with Time
Second Movement: Creation in Time
Bridge Passage: Creation Fulfilled
Third Movement: Working at Creation
Coda: Ongoing Creation

Ella Fitzgerald was one of America's greatest jazz singers. This volume is as complete a discography of her recorded songs as currently seems possible to compile. This volume also contains a complete discography (1927-1939) for drummer and bandleader Chick Webb, with whom Ella began her recording career in 1935. Part One includes a chronological listing of all known recorded performances of both Chick Webb and Ella. Part Two gives the complete contents of Ella's LPs and CDs, including track listings, titles (with lyricists and composers) and timings. Part Three is an annotated alphabetical listing of all songs contained on all of Fitzgerald's records, with detailed information on each song's composer, lyricist, and history. Reviews of the movies in which Ella appeared and surveys of her career with the Decca, Verve and Pablo music companies are included.

The book also has an index of album and CD recordings, and composers, lyricists and musicians.

The Music of Creation, with CD Univ of California Press

"Hazel Scott was an important figure in the later part of the Black renaissance onward. Even in an era where there was limited mainstream recognition of Black Stars,

Hazel Scott's talent stood out and she is still fondly remembered by a large segment of the community. I am pleased to see her legend honored." ---Melvin Van Peebles, filmmaker and director "This book is really, really important. It comprises a lot of history---of culture, race, gender, and America. In many ways, Hazel's story is the story of the twentieth century." ---Murray Horwitz, NPR commentator and coauthor of *Ain't Misbehavin'* "Karen Chilton has deftly woven three narrative threads---Adam Clayton Powell, Jr., Harlem, and Hazel Scott---into a marvelous tapestry of black life, particularly from the Depression to the Civil Rights era. Of course, Hazel Scott's magnificent career is the brightest thread, and Chilton handles it with the same finesse and brilliance as her subject brought to the piano." ---Herb Boyd, author of *Baldwin's Harlem: A Biography of James Baldwin* "A wonderful book about an extraordinary woman: Hazel Scott was a glamorous, gifted musician and fierce freedom fighter. Thank you Karen Chilton for reintroducing her. May she never be forgotten." ---Farah Griffin, Institute for Research in African-American Studies, Columbia University In this fascinating biography, Karen Chilton traces the brilliant arc of the gifted and audacious pianist Hazel Scott, from international stardom to ultimate obscurity. A child prodigy, born in Trinidad and raised in Harlem in the 1920s, Scott's musical talent was cultivated by her musician mother, Alma Long Scott as well as several

great jazz luminaries of the period, namely, Art Tatum, Fats Waller, Billie Holiday and Lester Young. Career success was swift for the young pianist---she auditioned at the prestigious Juilliard School when she was only eight years old, hosted her own radio show, and shared the bill at Roseland Ballroom with the Count Basie Orchestra at fifteen. After several stand-out performances on Broadway, it was the opening of New York's first integrated nightclub, Caf é Society, that made Hazel Scott a star. Still a teenager, the "Darling of Caf é Society" wowed audiences with her swing renditions of classical masterpieces by Chopin, Bach, and Rachmaninoff. By the time Hollywood came calling, Scott had achieved such stature that she could successfully challenge

the studios' deplorable treatment of black actors. She would later become one of the first black women to host her own television show. During the 1940s and 50s, her sexy and vivacious presence captivated fans worldwide, while her marriage to the controversial black Congressman from Harlem, Adam Clayton Powell, Jr., kept her constantly in the headlines. In a career spanning over four decades, Hazel Scott became known not only for her accomplishments on stage and screen, but for her outspoken advocacy of civil rights and her refusal to play before segregated audiences. Her relentless crusade on behalf of African Americans, women, and artists made her the target of the House Un-American Activities Committee (HUAC)

during the McCarthy Era, eventually forcing her to join the black expatriate community in Paris. By age twenty-five, Hazel Scott was an international star. Before reaching thirty-five, however, she considered herself a failure. Plagued by insecurity and depression, she twice tried to take her own life. Though she was once one of the most sought-after talents in show business, Scott would return to America, after years of living abroad, to a music world that no longer valued what she had to offer. In this first biography of an important but overlooked African American pianist, singer, actor and activist, Hazel Scott's contributions are finally recognized. Karen Chilton is a New York-based writer and actor, and the coauthor of *I Wish You Love*, the memoir of legendary jazz vocalist Gloria Lynne.

Jazz Blues Play-Along Alfred Music Publishing

Being sent for piano lessons was probably the single worst thing that could have happened in my young life. But thanks to an exceptional lady and piano teacher named Florence Powers, I wound up unexpectedly becoming a professional piano player. Here are some curious things about the piano that I picked up along the way... Playing the piano has got to be one of life's greatest treasures. In my estimation, there are few other activities that can even begin to compare with the ability to play this amazing instrument. As you can probably guess, I have the highest regard for those individuals who have mastered the art of playing the piano. Some performers have taken the art to a very high level, often out of the

reach of most players. But my aim here is to present a simple accessible approach on learning how to listen to, or how to approach playing the piano for one ' s own pleasure... first and foremost. This self-centered idea doesn ' t necessarily imply being selfish, but it probably does require a slight adjustment to one ' s priorities. However, if you can get around this inconvenience, the possibilities are sitting right there in front of you... and all you have to do is reach out and take. My aim here is to demystify the piano for both listeners or those who wish to learn how to get started in learning how play this amazing instrument. In any event, I feel that pleasure can be derived by having a wider understanding as just what the piano actually is. And while a book such as this one may be helpful to those who wish to learn to play the piano, there is no substitute for a live teacher. However, it ' s extremely important to find a teacher that can fulfill one ' s personal musical taste and ambition. There is much involved if a student wishes to become a proficient music reader, thus having a good teacher is essential to success in this area. Take your time in finding the right one... and good luck! However, before looking at the piano, it ' s also important to establish what kind of music one is interested in, whether for listening or performing. For purposes of this book, I have arbitrarily broken it down into four major forms: Classical, Standards, Popular and Jazz. Classical leads the list as the music that has been around longer, much longer than the other two forms of music. It represents the foundation of all of today ' s music. Much of it is seriously challenging to play, and requires years of dedicated practice. At the concert level,

Olympic style discipline prevails, as the techniques of performance far surpasses the scope of this book. Be that as it may, classical music has an abundance of priceless melodies that can be played in a simplified manner while still retaining their pure magic for listeners. (and pianists) Music operates on principles that were founded in the past 600 years, they carry with them an enormous amount of human cultural genius, including the invention of equal temperament.
