Constraints and Databases contains seven contributions on the rapidly evolving research area of constraints and databases. This collection of original research articles has been compiled as a tribute to Paris C. Kanellakis, one of the pioneers in the field. Constraints have long been used for maintaining the integrity of databases. More recently, constraint databases have emerged where databases store and manipulate data in the form of constraints. The generality of constraint databases makes them highly attractive for many applications. Constraints provide a uniform mechanism for describing heterogeneous data, and advanced constraint solving methods can be used for efficient manipulation of constraint data. The articles included in this book cover the range of topics involving constraints and databases; join algorithms, evaluation methods, applications (e.g. data mining) and implementations of constraint databases, as well as more traditional topics such as integrity constraint maintenance. Constraints and Databases is an edited volume of original research comprising invited contributions by leading researchers.

TARGET SNAP 2018 (Past Papers 2005 - 2017) + 5 Mock Tests 10th Edition Disha Publications

This Study Text has been reviewed by the examiner and concentrates on the key areas of the syllabus, taking into account the examiner's guidance on how topics will be examined. The Text takes a step-by-step approach to producing consolidated financial statements and lots of exercises which allow you to practise the workings. We guide you through the more problematic topics which can be brought into the preparation of single company financial statements, and encourage you to develop the critical awareness of problems in financial reporting which the examiner expects to see demonstrated at this level. The Study Text is suitable for both

International and UK streams. Additional topics relating to the UK are covered in an online supplement.
