From a legendary writer both beloved and banished by Iraq -- a fine work of Arabic literature in the vein of Naguib Mahfouz and Elias Khoury, and a magical and moving comic novel about the birth of modern Iraq. Kirkuk, Iraq, the 1950s. The day Hameed Nylon

loses his job, and gains an unfortunate nickname, is the day that his life begins: dismissed as a chauffeur when rumors surface that he propositioned his British boss's posh-tart wife, Hameed finds his true calling as a revolutionary in an Iraq that is destined for a sea change. Also bent on bucking the system is Hameed's brother-in-law, the money-scheming butcher Khidir Musa, who runs off suddenly to Russia to find two brothers who have been missing since World War I. And the key to their fate is held by a seven-year-old boy, Burhan Abdallah, who stumbles upon an old chest in his attic that allows him to speak with three white-robed old men, beings who inform him that they are, in fact, angels.

This book offers a comprehensive introduction to workflow management, the management of business processes with information technology. By defining, analyzing, and redesigning an

organization's resources and operations, workflow management systems ensure that the right information reaches the right person or computer application at the right time. The book provides a basic overview of workflow terminology and organization, as well as detailed coverage of workflow modeling with Petri nets. Because Petri nets make definitions easier to understand for nonexperts, they facilitate communication between designers and users. The book includes a chapter of case studies, review exercises, and a glossary. A special Web site developed by the authors, www.workflowcourse.com, features animation, interactive examples, lecture materials, exercises and solutions, relevant links, and other valuable resources for the classroom.
